

The Future of Digitization for HSE

September 2022

Dr Rustom Kanga
Co-Founder/ CEO

The Keppel Shipyards have HIGH IQ

Explosions while Welding

IOCL, India

Managing Road Traffic

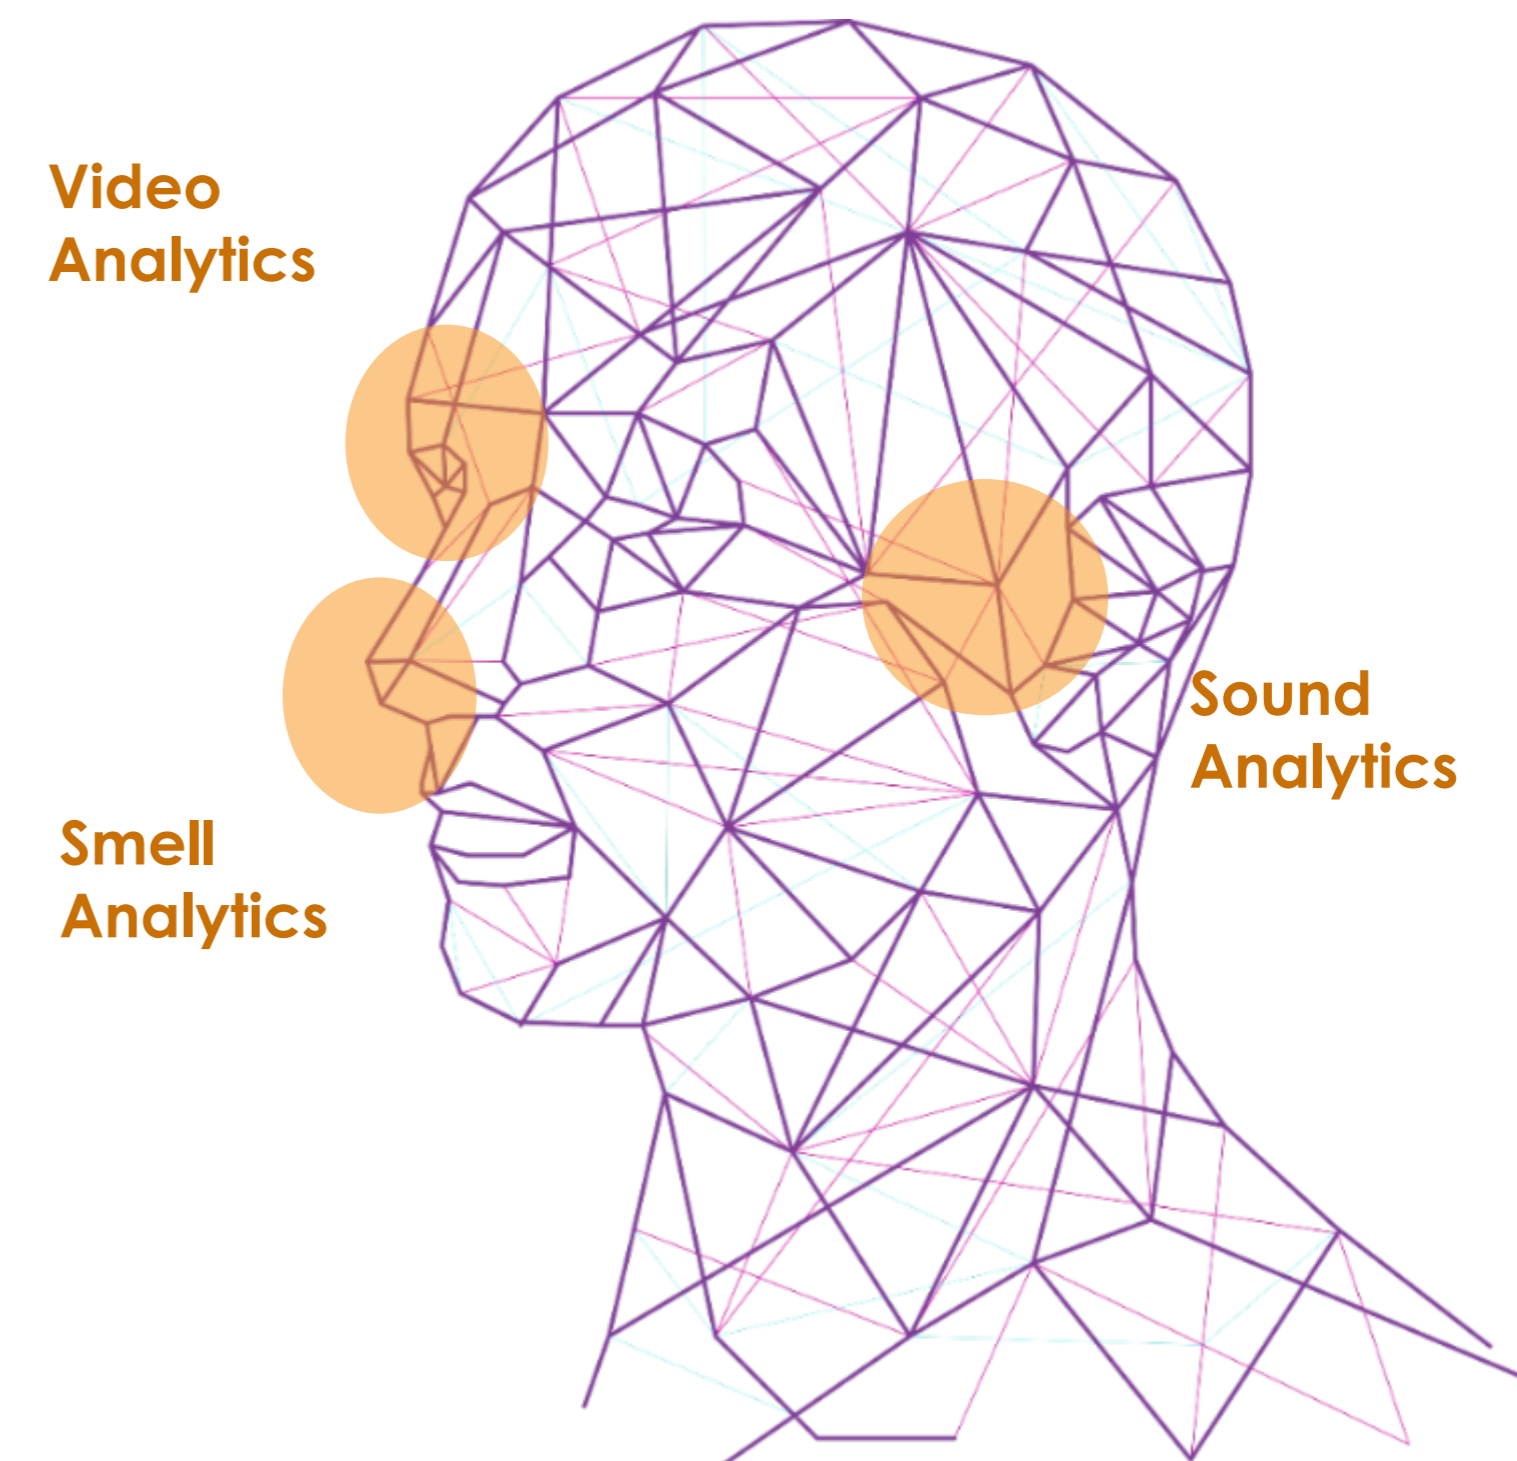

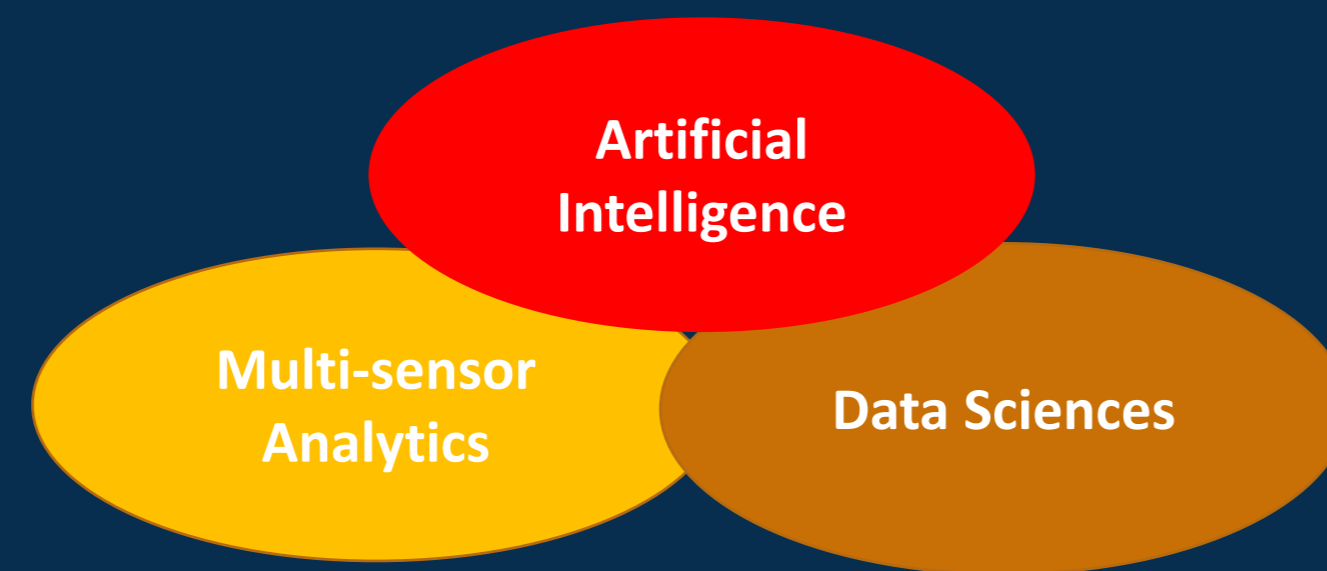

Understanding the Situation

Preventative Action

Autonomous Real Time Response

Multi-sensory Artificial Intelligence

Complex Behaviour Analytics & Comprehensive Recognition Capabilities

SMELL ANALYTICS

400 Different Molecules in
Coffee

Petrochemicals can be far
more complex

- What is Easy
- What is Difficult
- What is Impossible

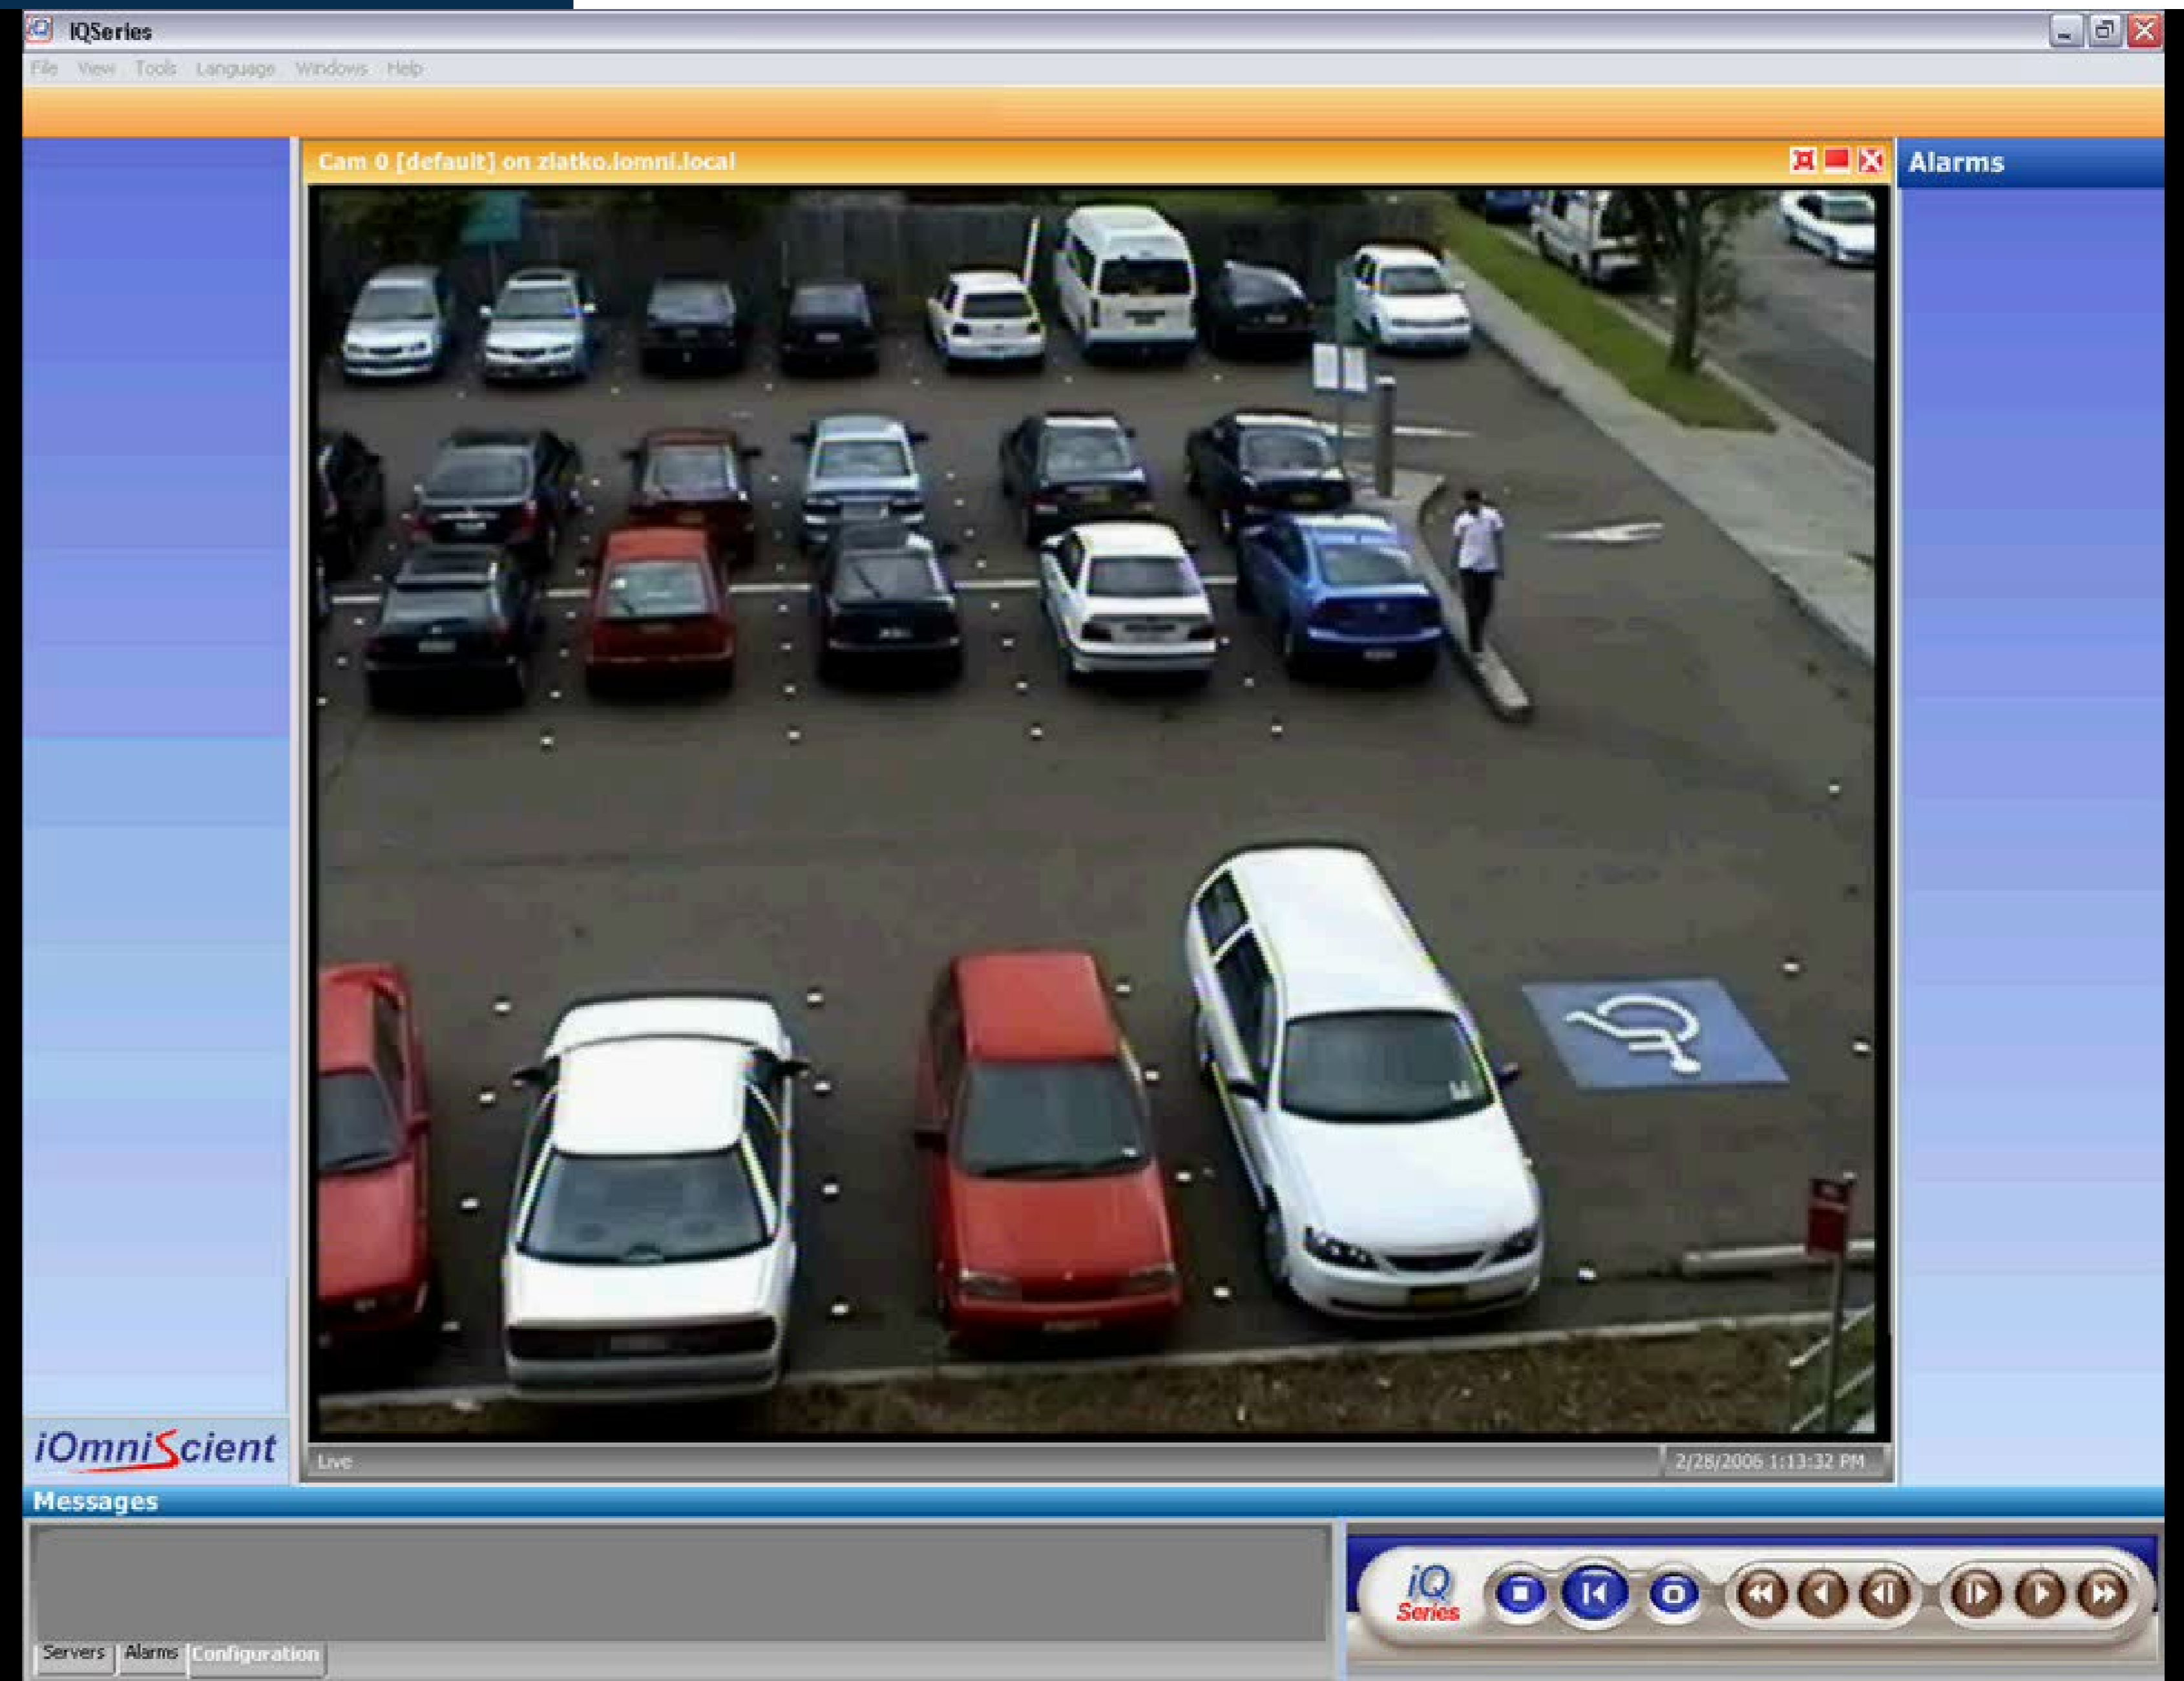

COMMON REQUIREMENTS

SAFETY FOR PEOPLE

- Contactless reliable Access Control
- PPE Detection
- Liquid Spills
- Slip and Fall
- Evacuation Management
- Object Detection – e.g. tools left behind
- Intrusion & Vandalism Detection

Complex Analytics

Safety:

- Wet Floors
- Slip and Fall Detection

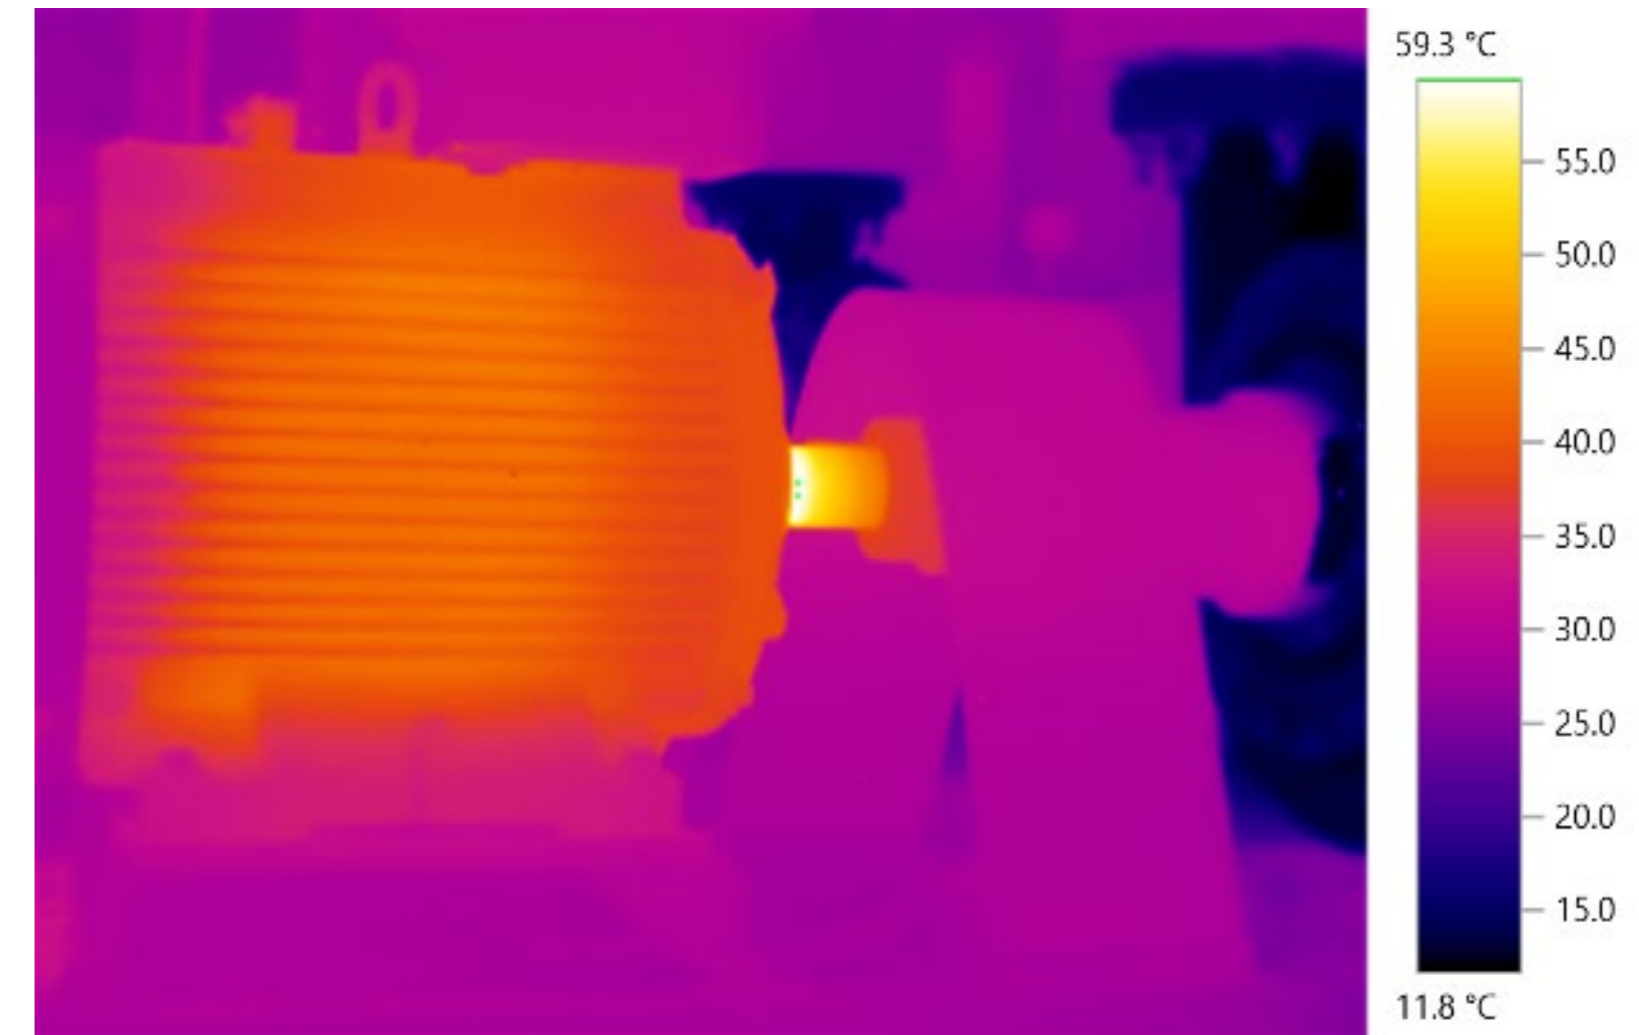

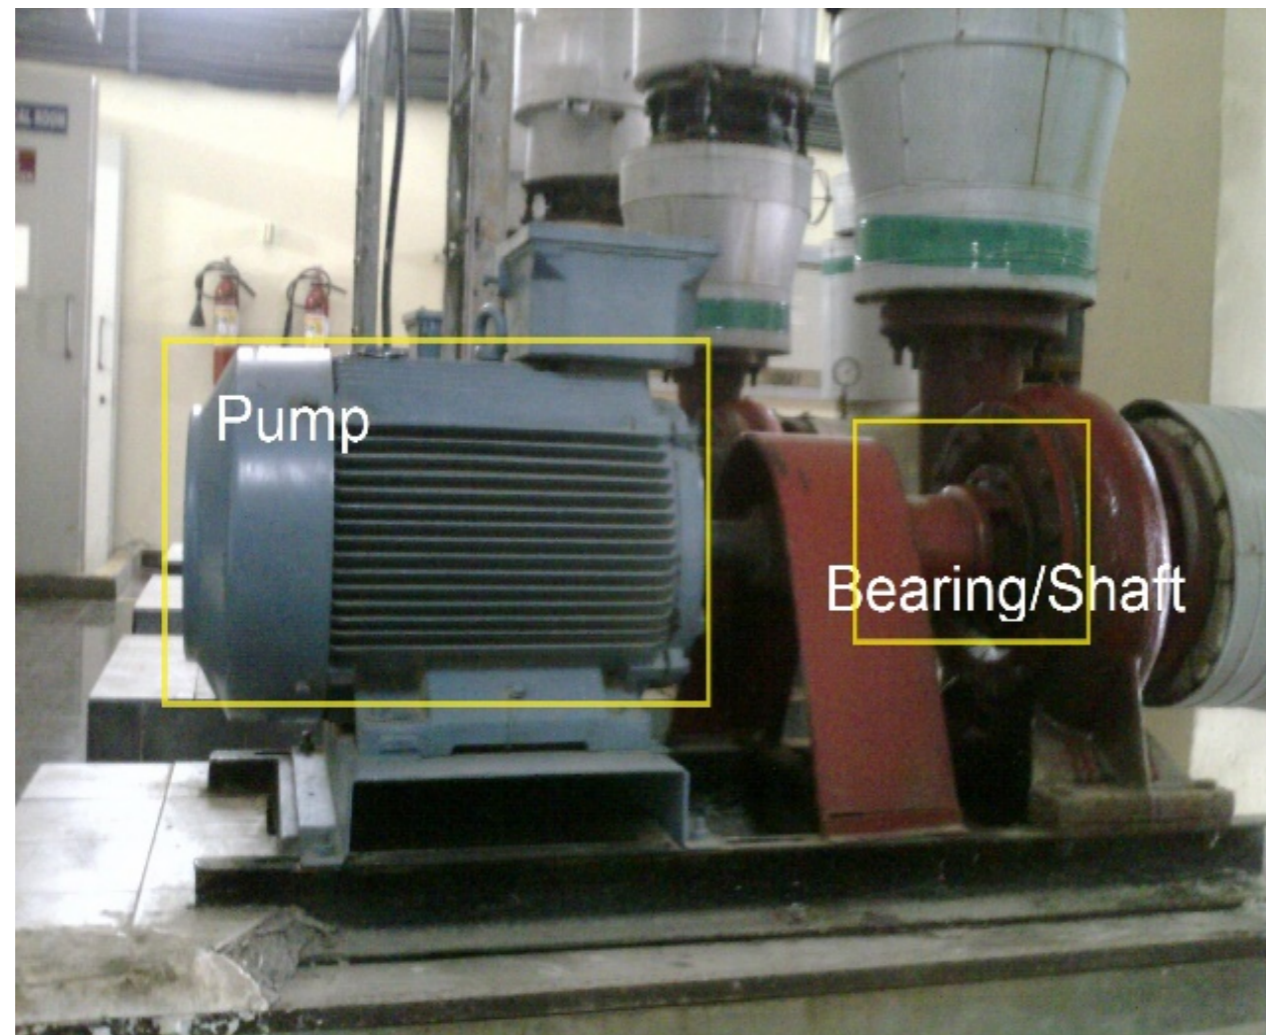

COMMON REQUIREMENTS

SAFETY OF ASSETS

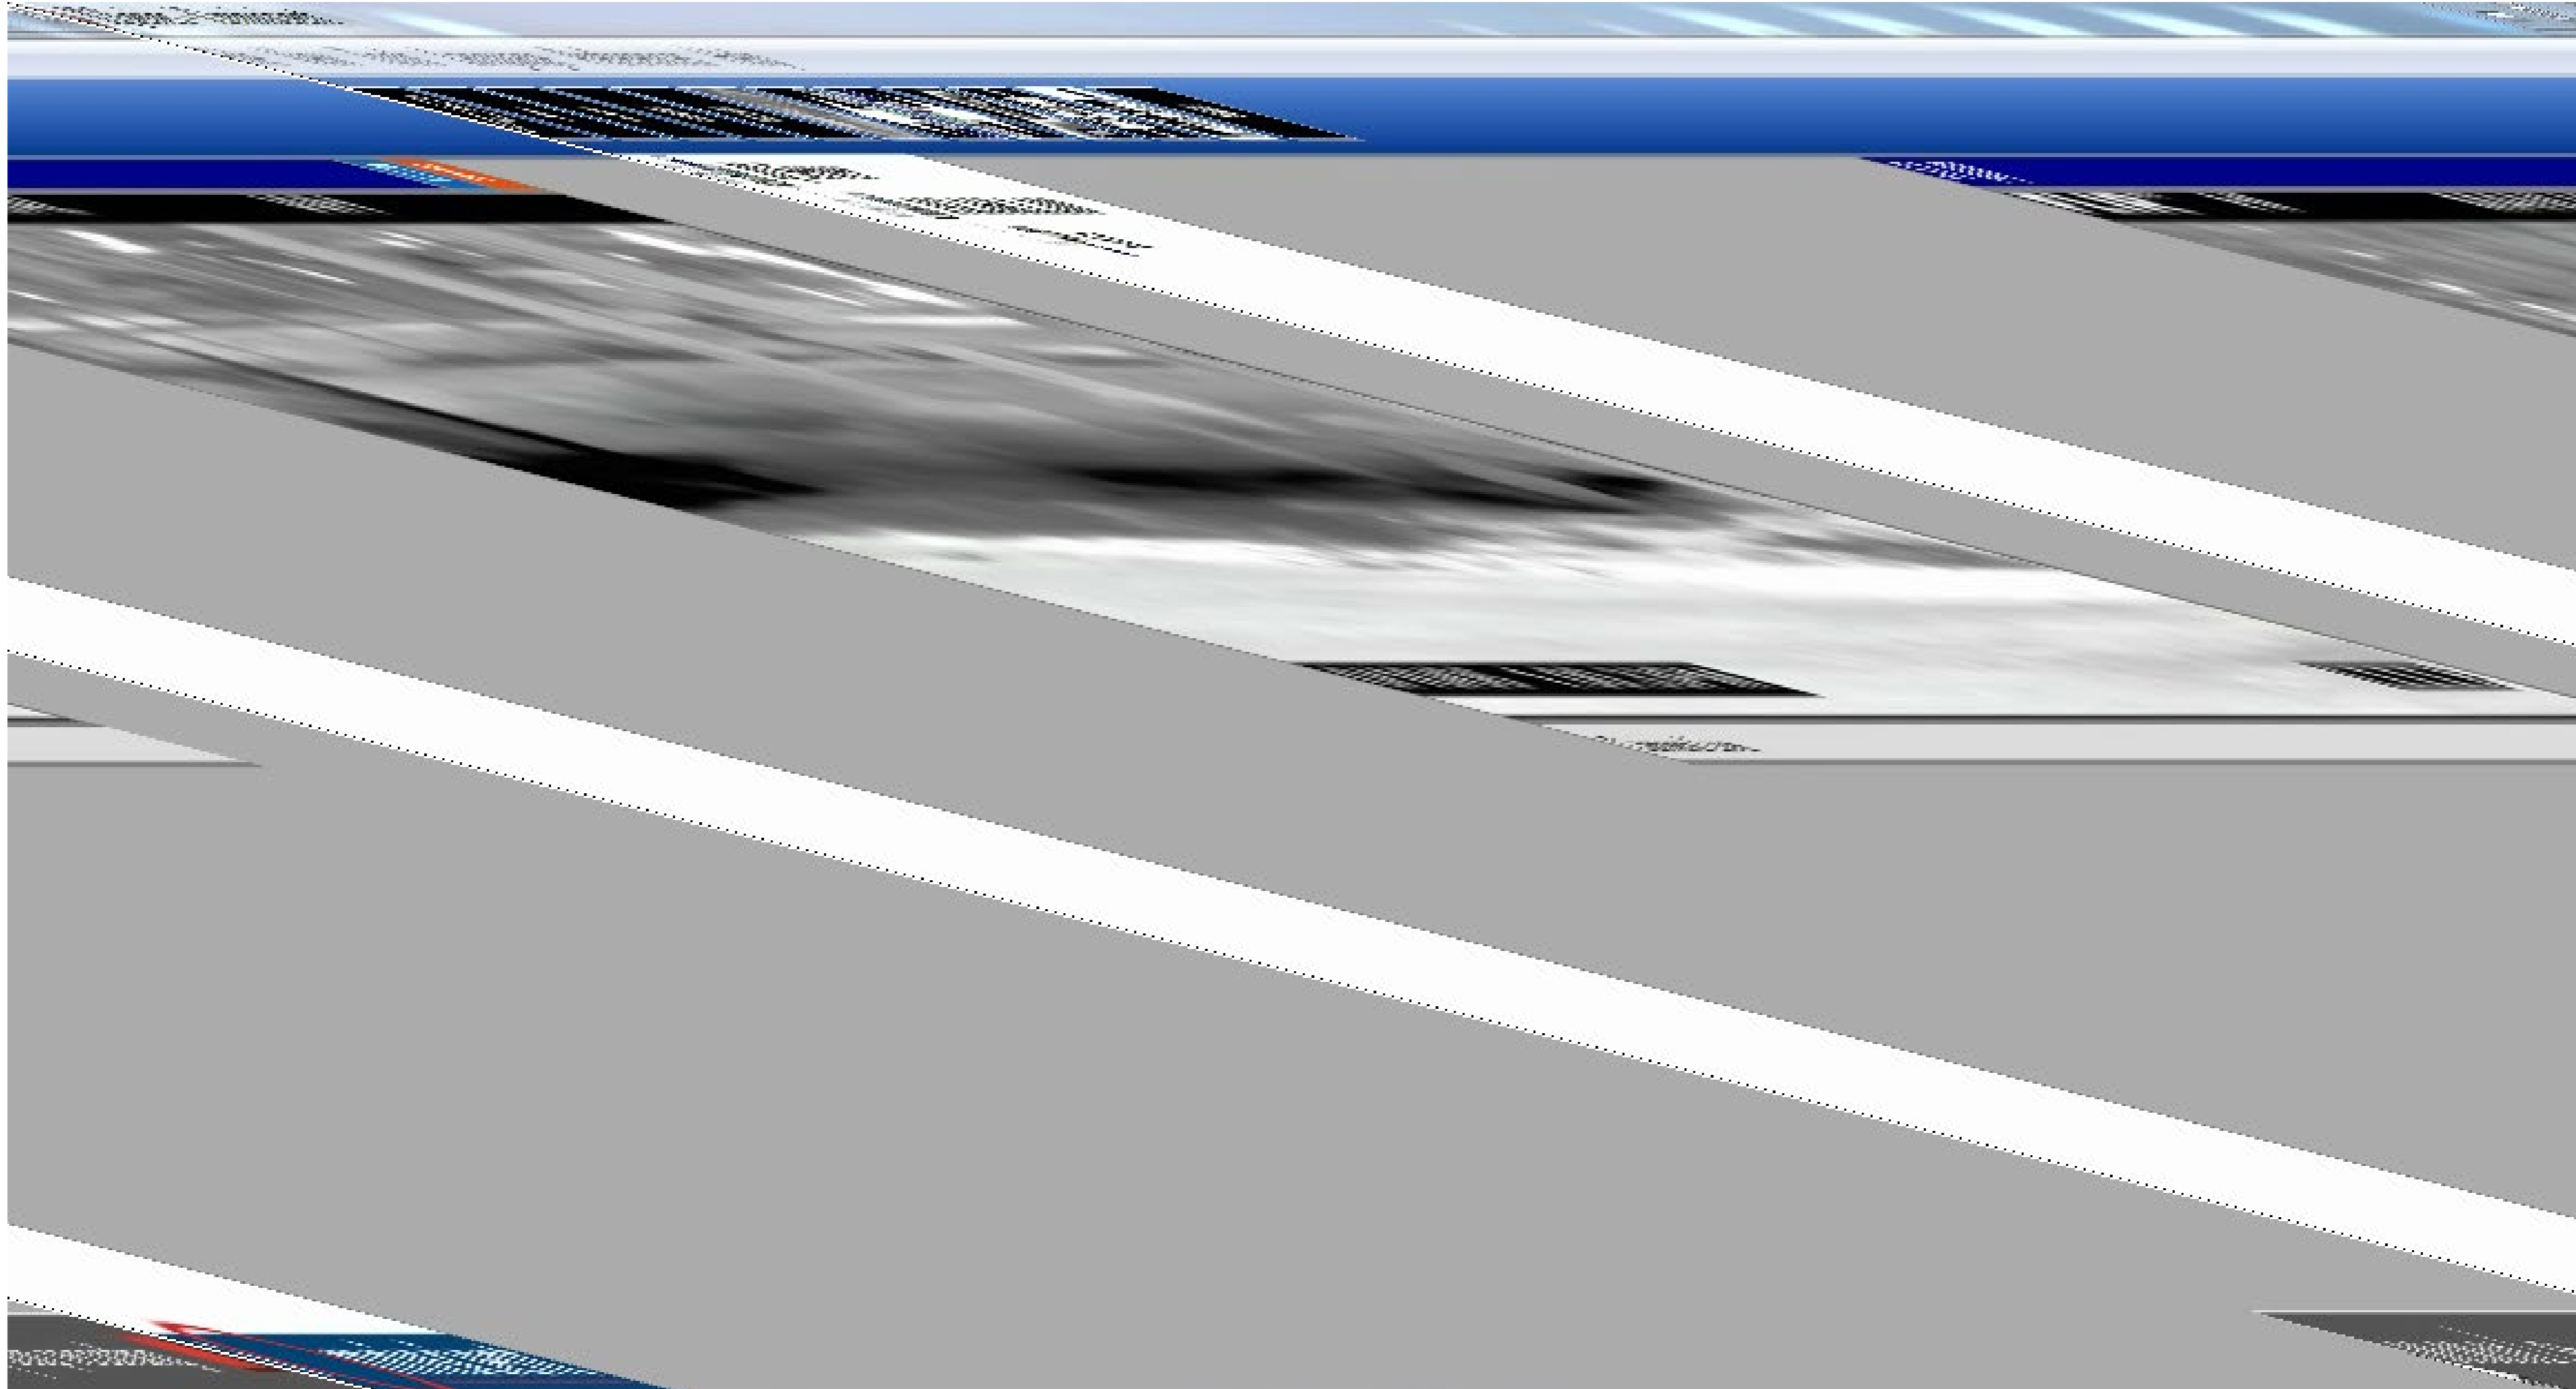

- Preventive Maintenance
- Gas Leaks
- Smoke and Fire Detection
- Quality Assurance

PREDICTIVE MAINTENANCE

Gas Leak Detection

QA in the Dairy Industry

COMMON REQUIREMENTS

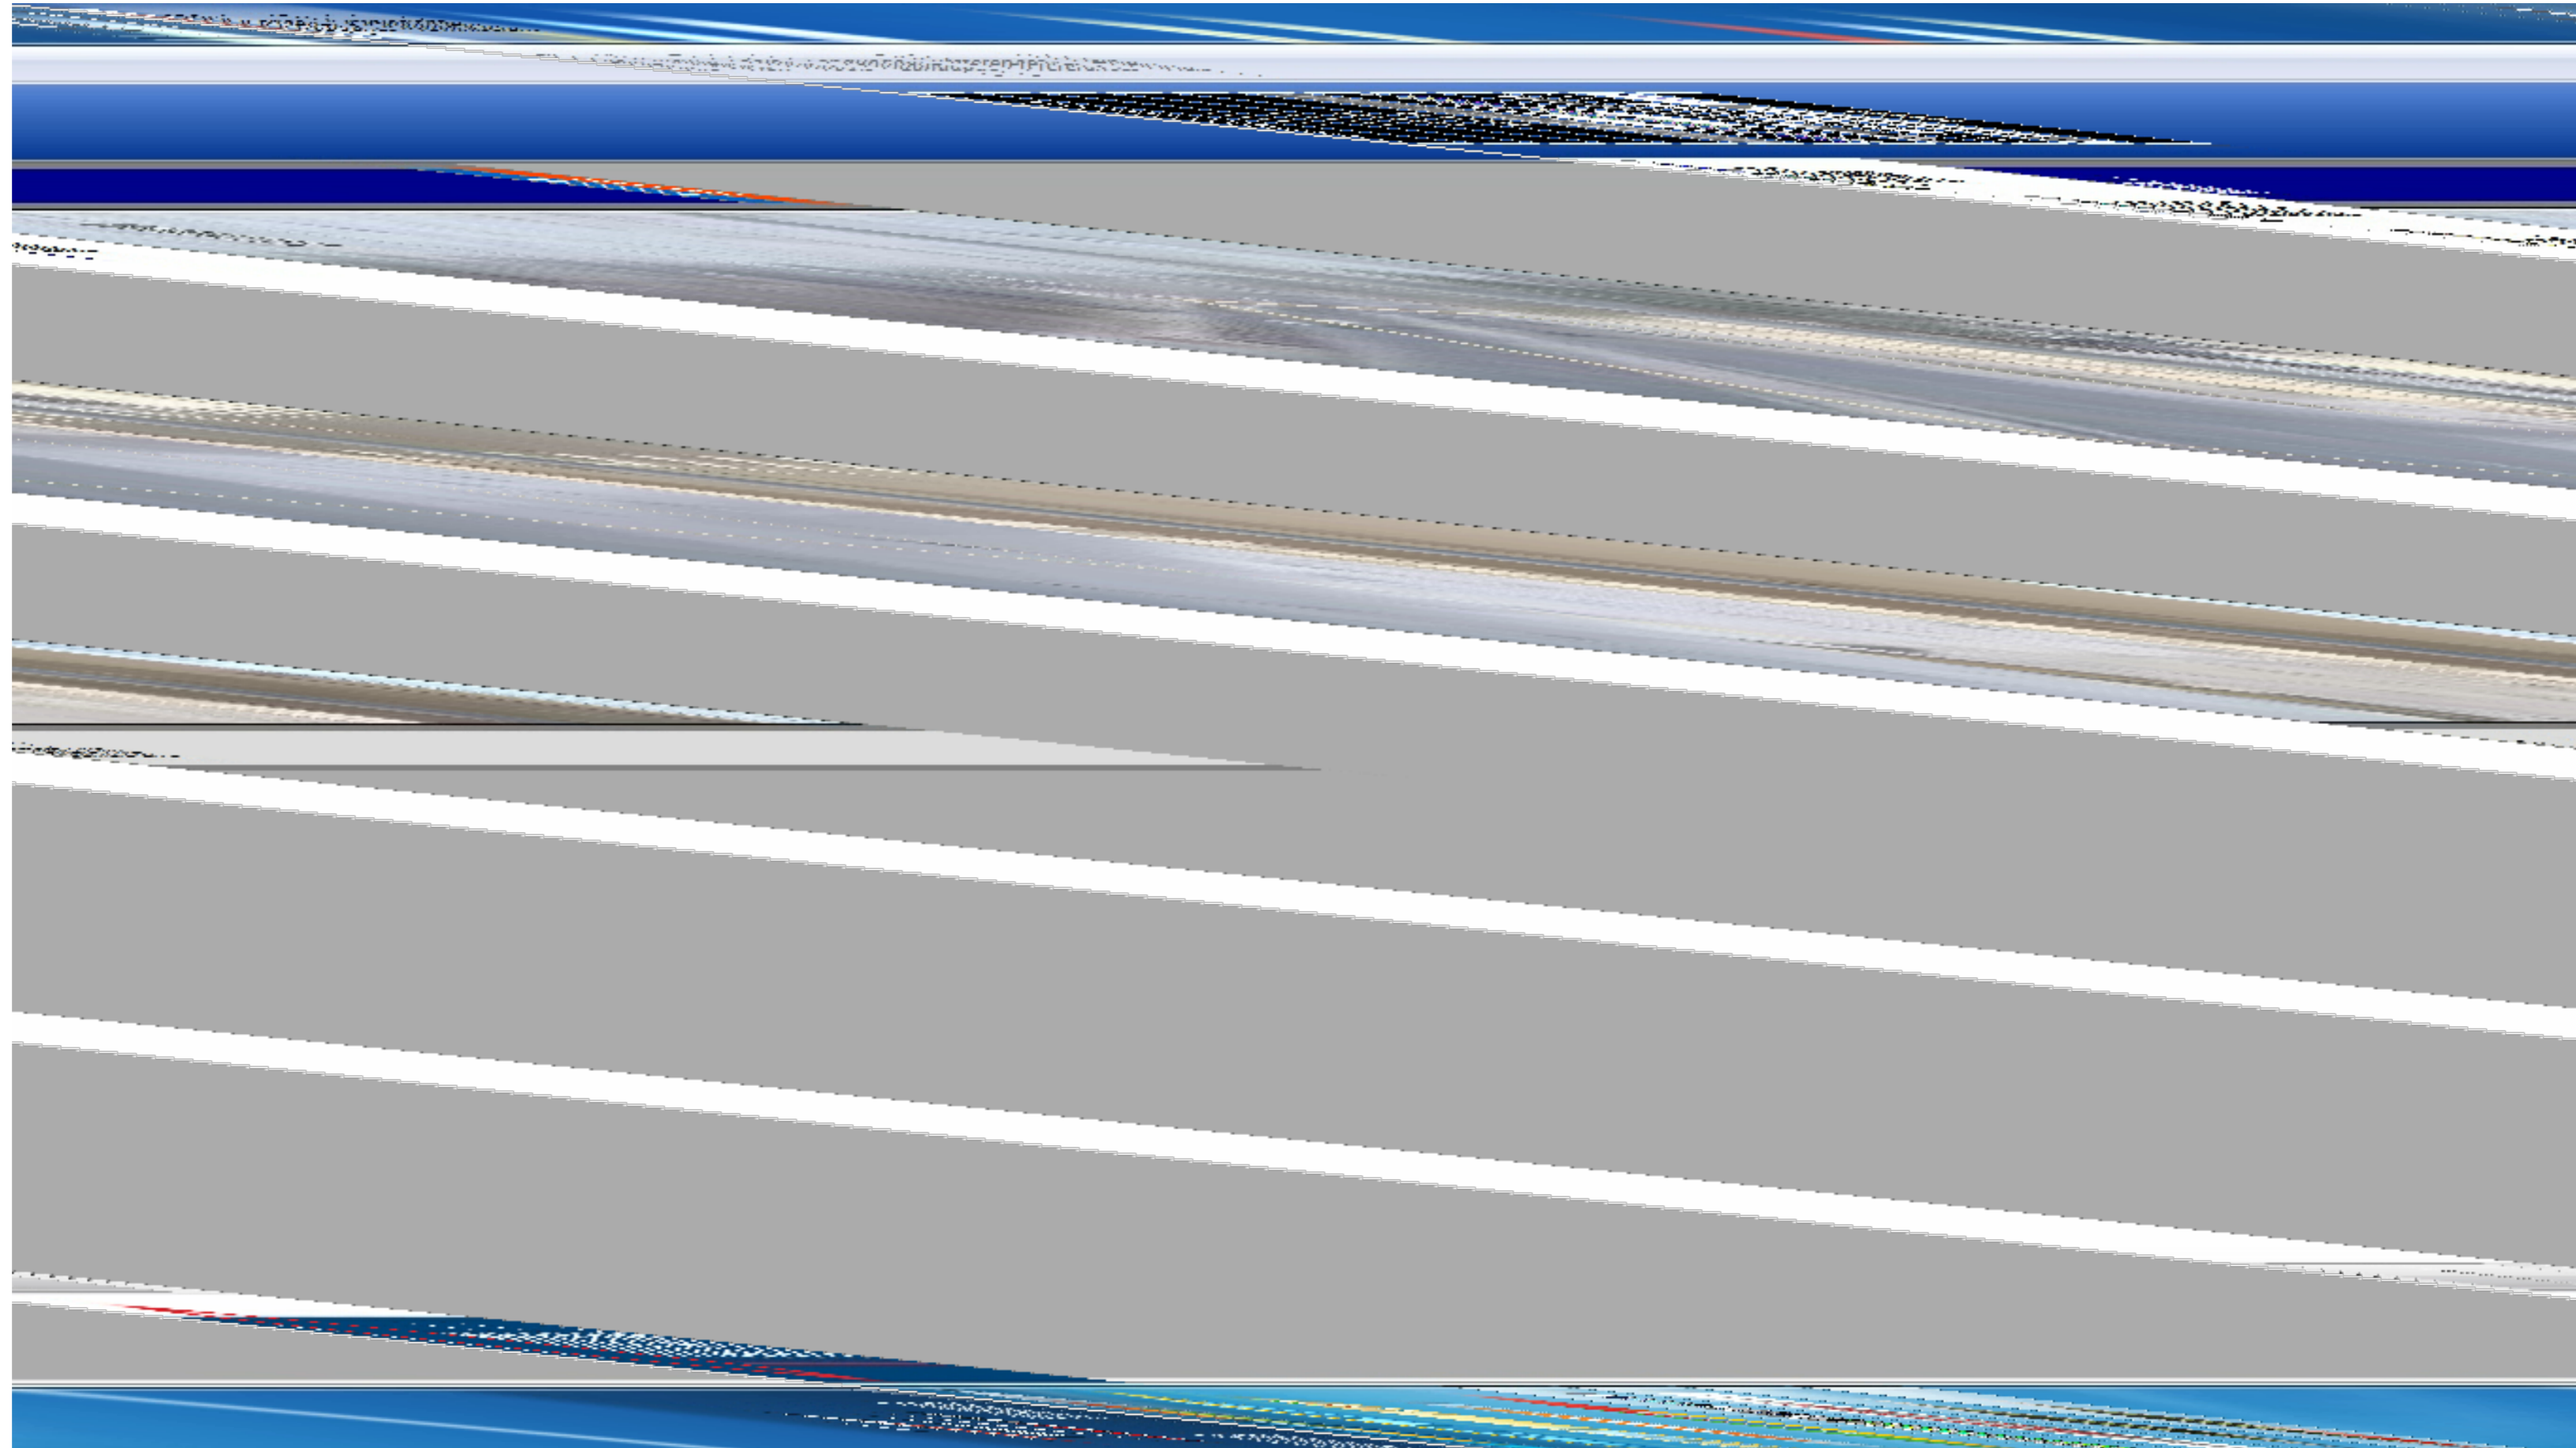

SAFETY ON THE ROADS

- Parking Management
- Speed Management
- Traffic Incident

iQ-Roads – Speeding

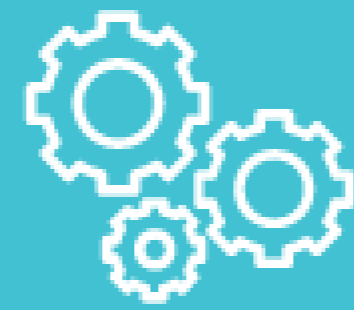

SAFETY &
MENT

Drilling and Extraction

Operations

- Calculate occupancy of the platform by monitoring entry and exit points
- Evacuation Management
- Manage access to secure locations
- Detect spills, or leakages of oil or any other hazardous material

Security

- Prevent unauthorized access and tailgating into vital facilities
- Validate the identity of all workers as they board the platform
- Detect boats and ships approaching the platform particularly at night

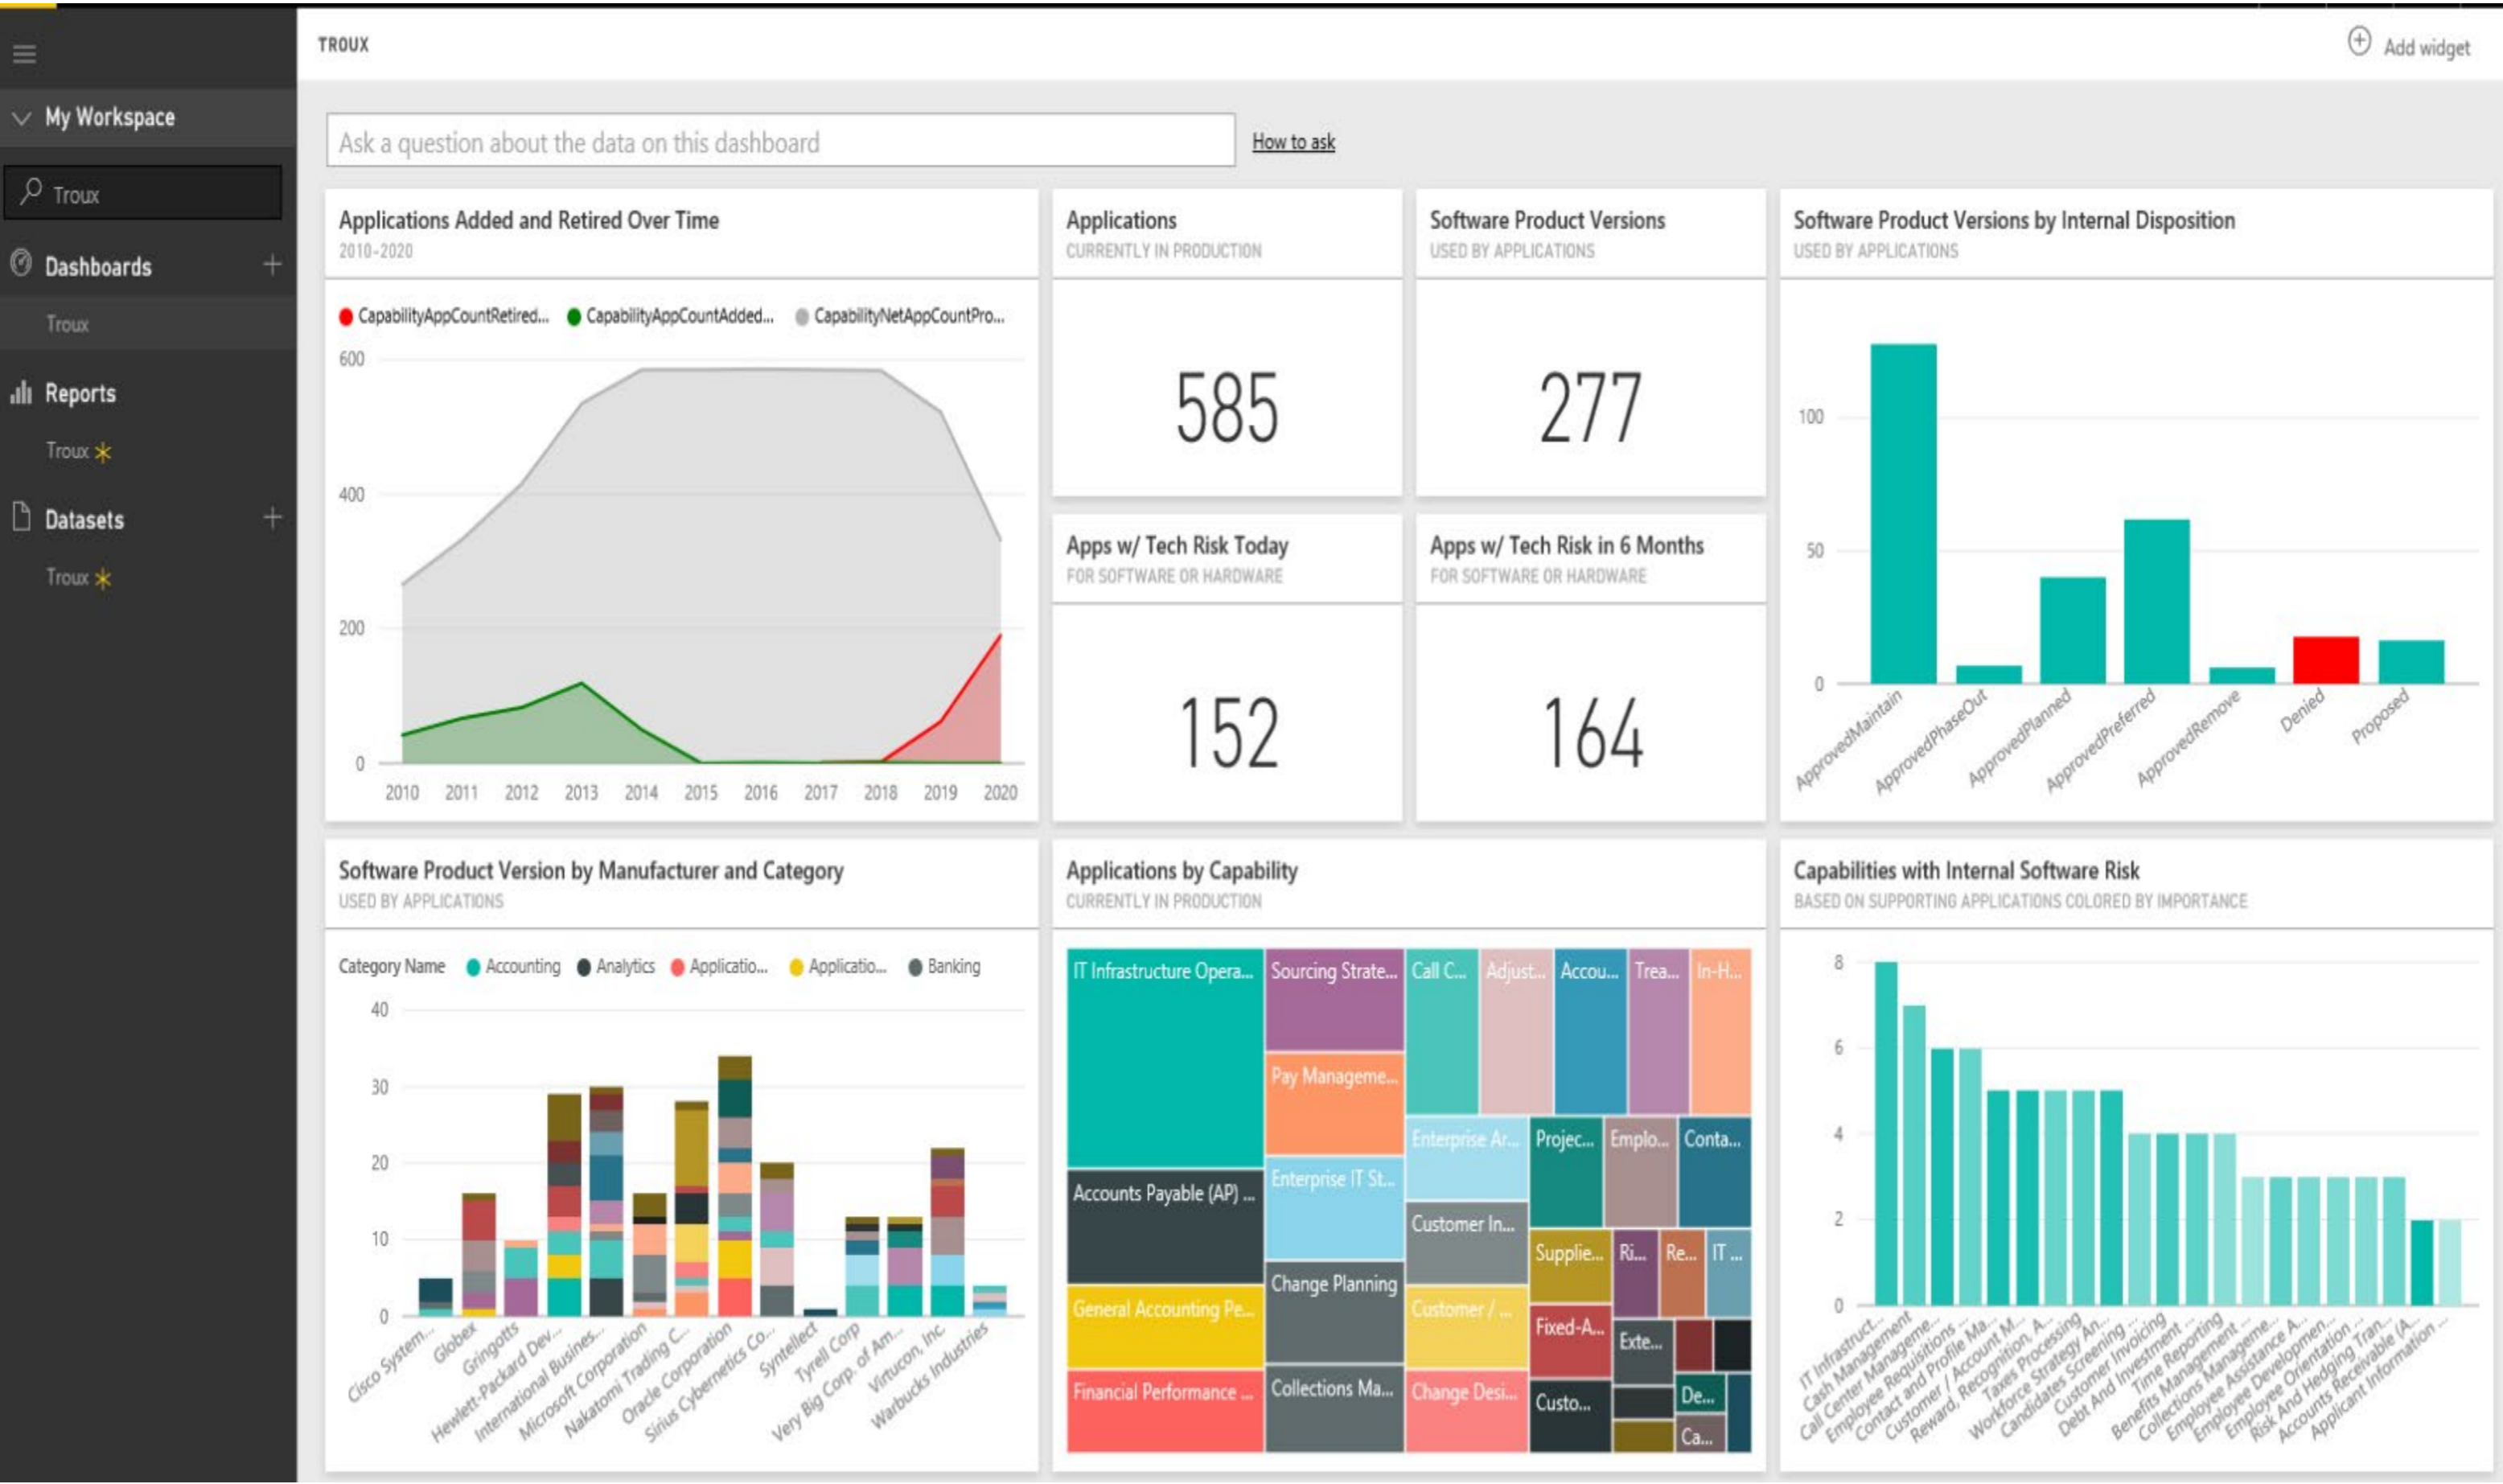

Safety

- Verify workers are wearing safety helmets and jackets
- Verify workers are clear of operational cranes
- Exhaust and emissions to spot dangers
- Fever Detection
- Detect smoke and fire
- Detect tools, equipment, and tripping or falling hazards
- Detect running in hazardous areas where slips and falls can occur

Comprehensive Information

Dashboard Example

Characteristics of the system

Situation Analysis

Detection despite Obscuration

Generally Video Analytics are designed to work in relatively empty scenes.

iOmniscient has the internationally patented ability to operate in crowds or when an object is obscured. This includes:

- Theft when object is obscured
- Smoke & Fire Detection IN A CROWD
- Object Abandoned and obscured
- Counting IN A CROWD
- Face Recognition IN A CROWD
- Fever Detection IN A CROWD

NAMS

(Nuisance Alarm Minimization System)

2nd Generation AI

Training with a Dataset of 10
rather than 10,000

Allows for Fast Deployment

Computing Light – No GPUs

Wildfaces.ai

**New iOmniscient
subsidiary focussed
on 3rd Generation AI**

**Analytics ON THE
MOVE**

WildFaces.ai
wildAI On-The-Move 

iOmniscient
Autonomous AI

Autonomous Operation

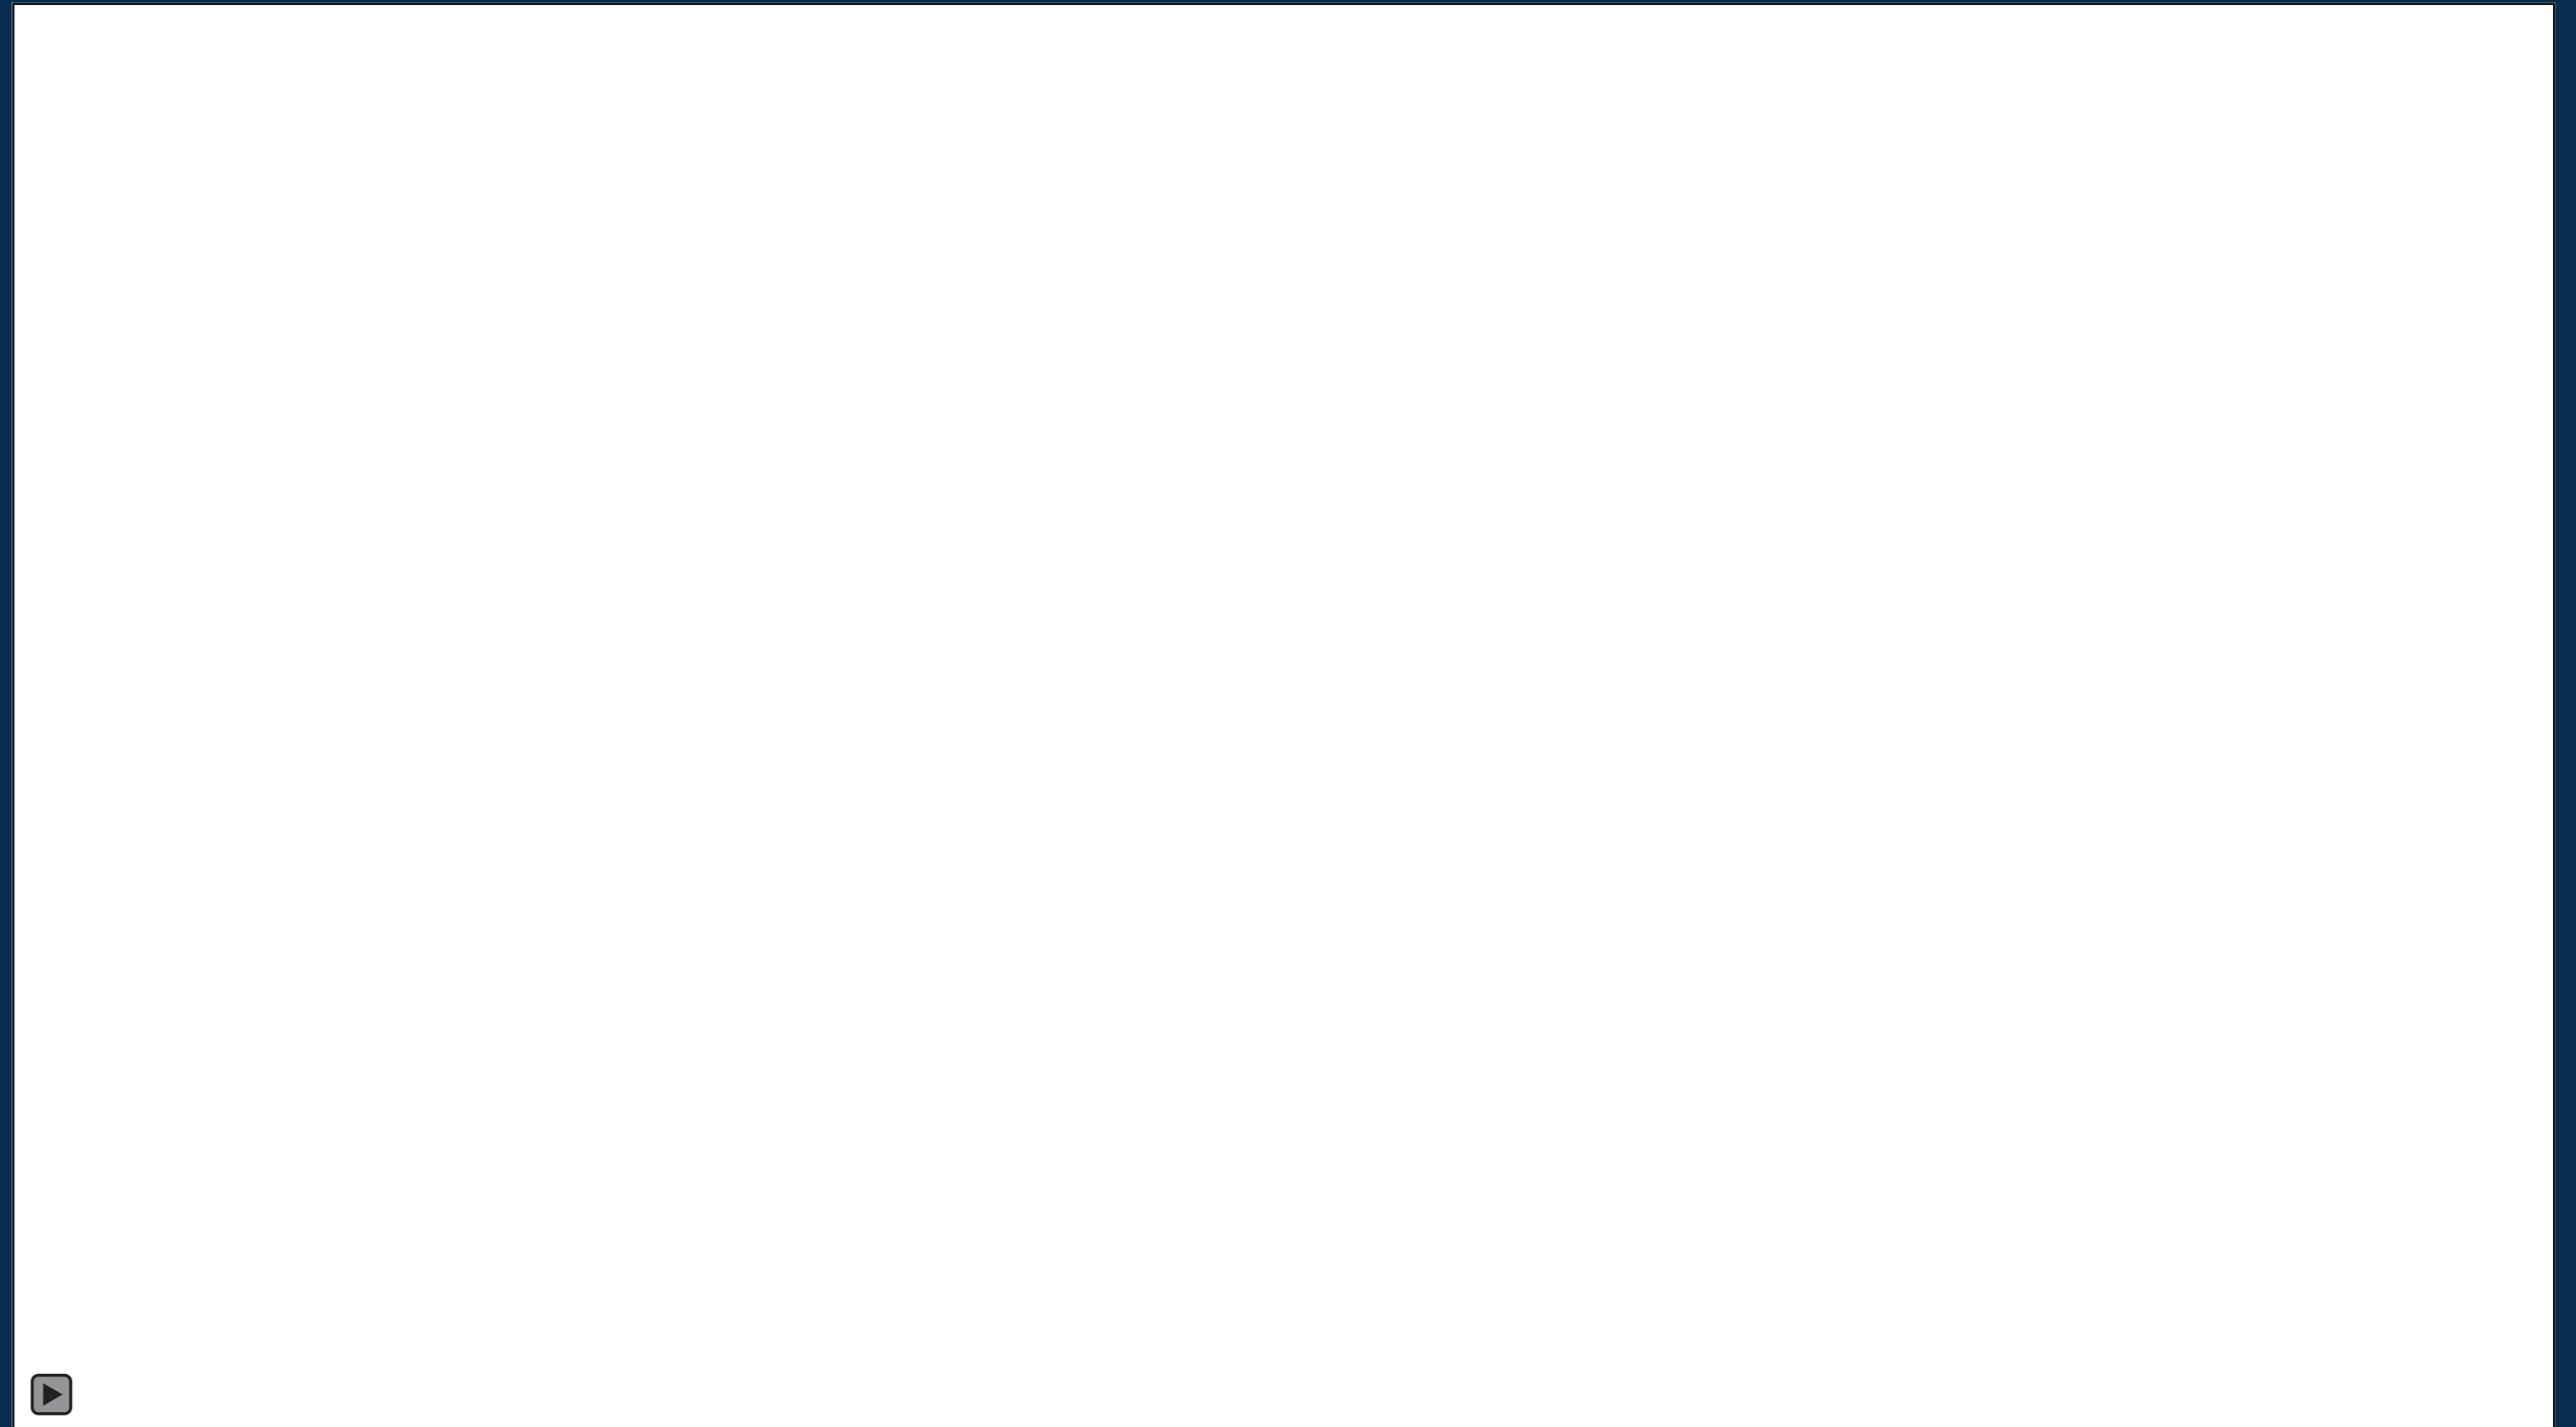

Autonomous Operations for Security and Safety

Detect Event

Track persons involved

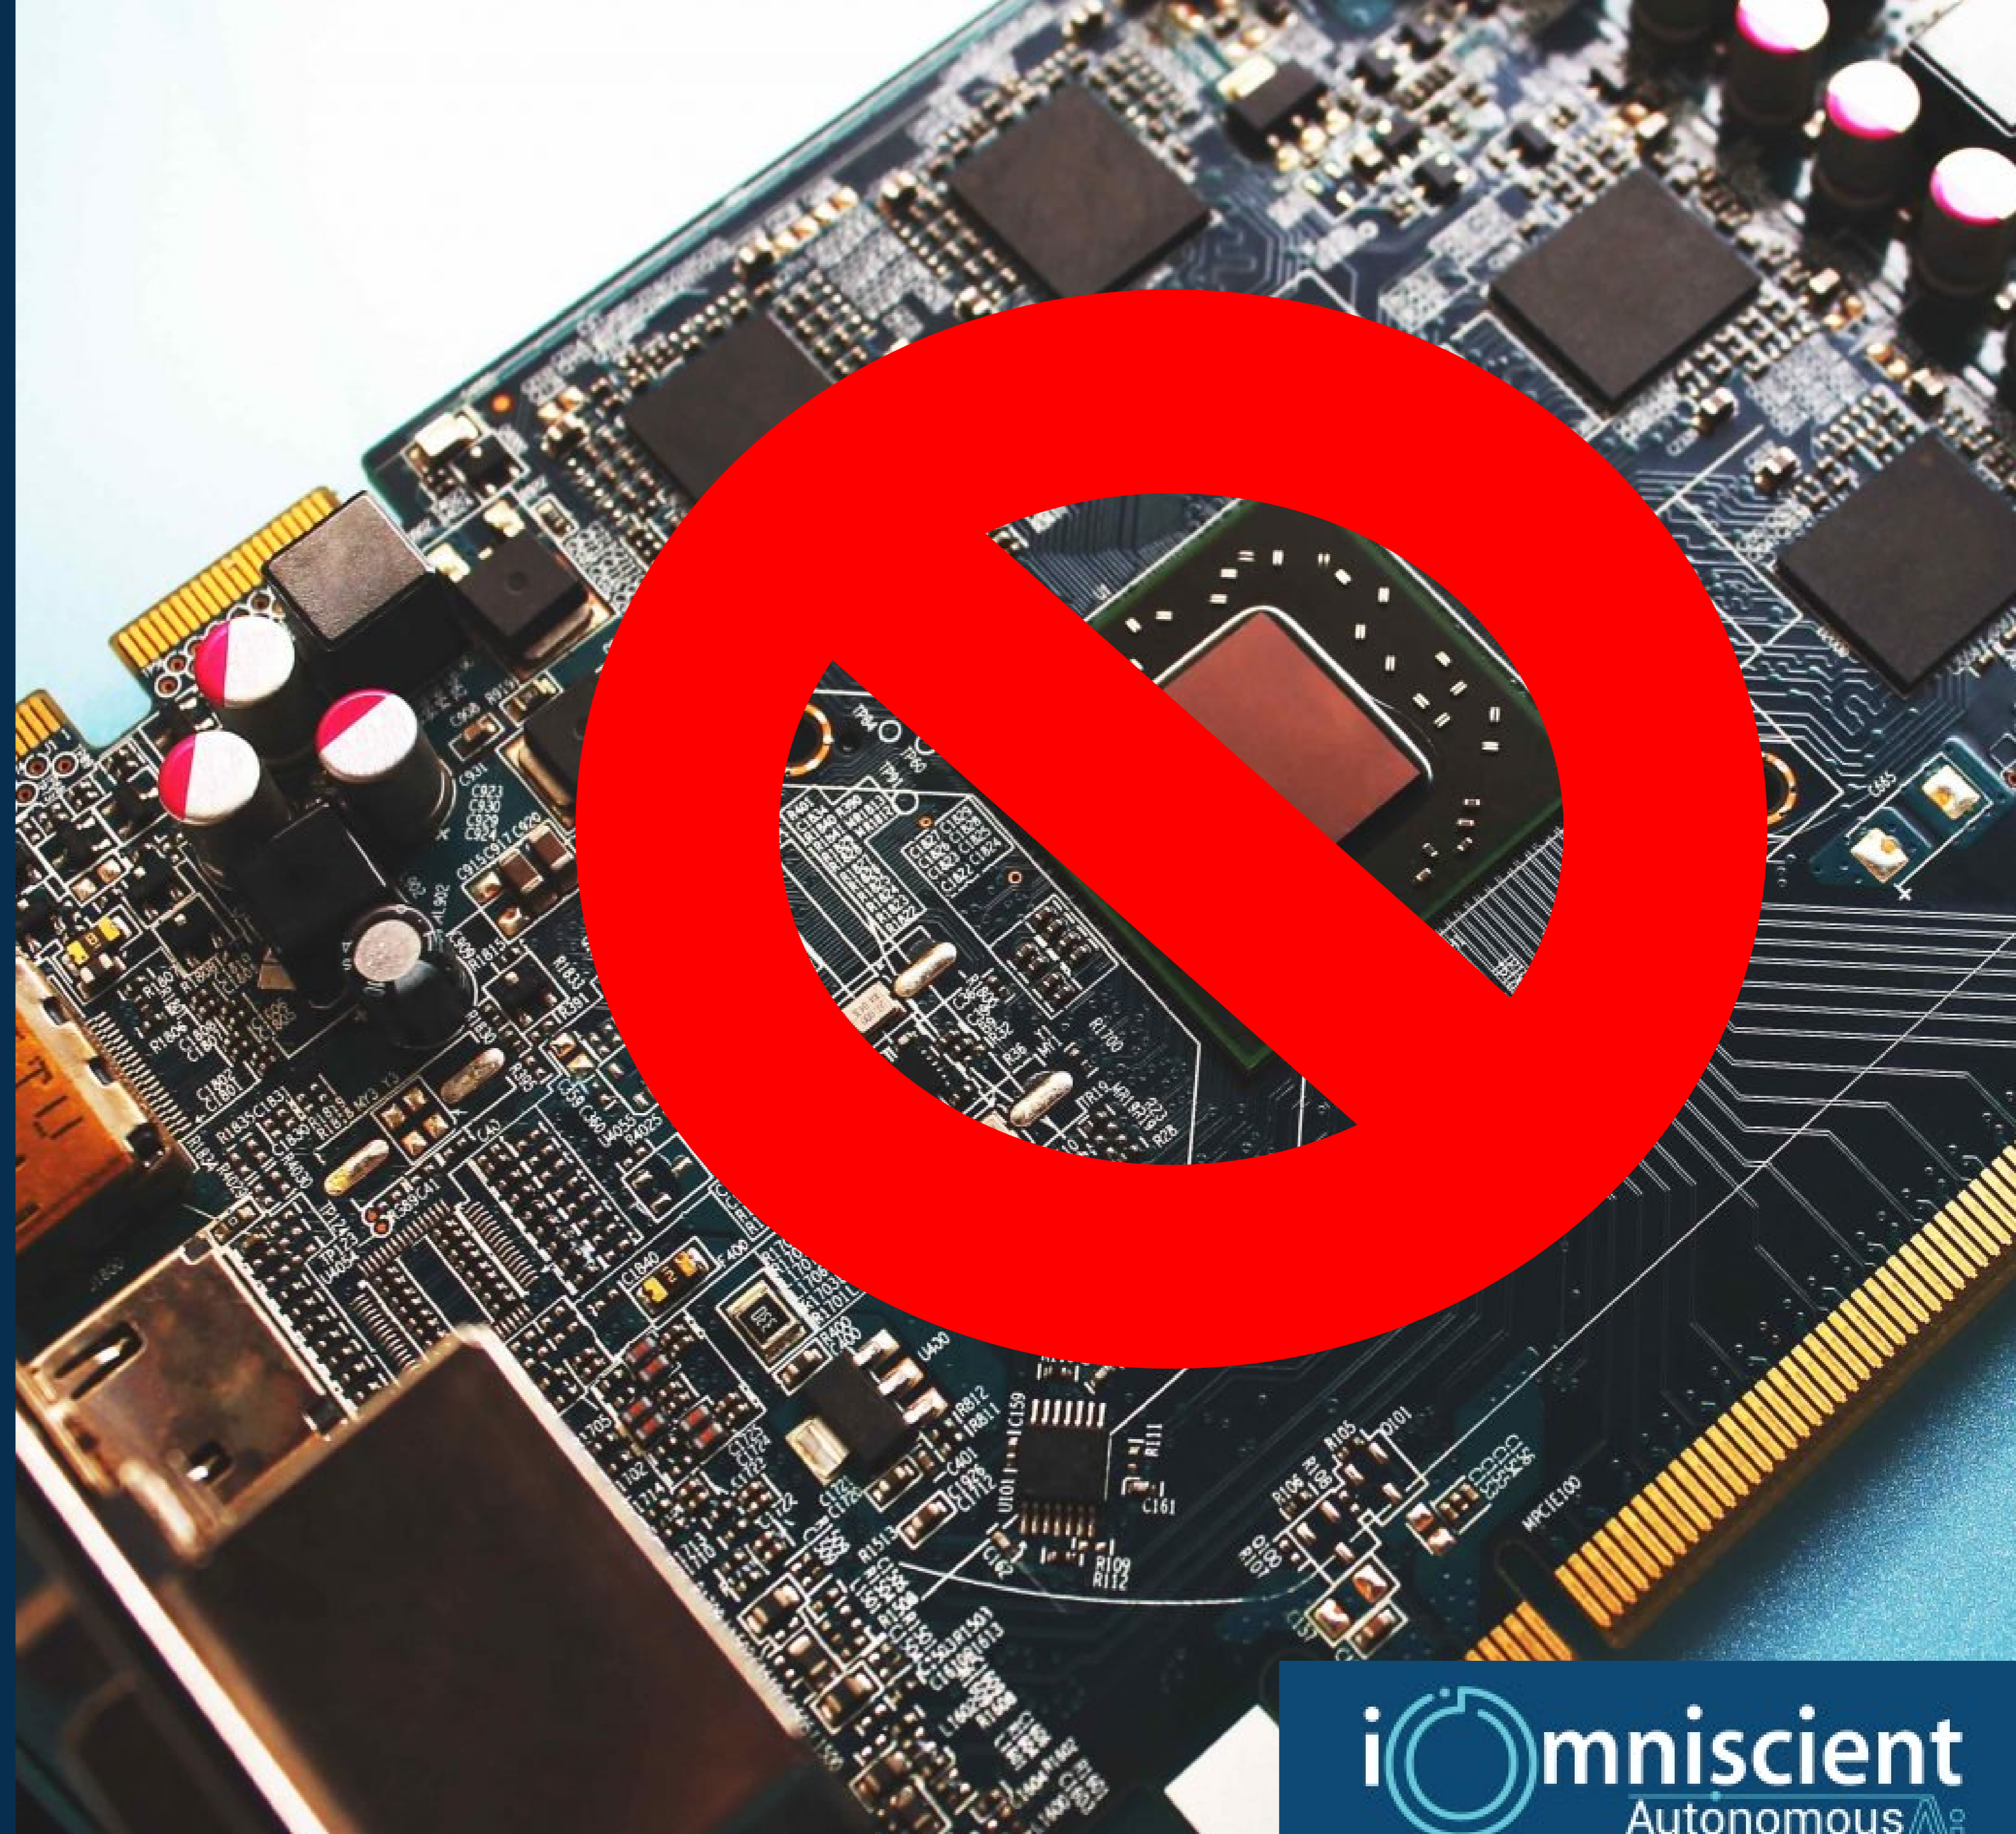

Alert nearest Responder

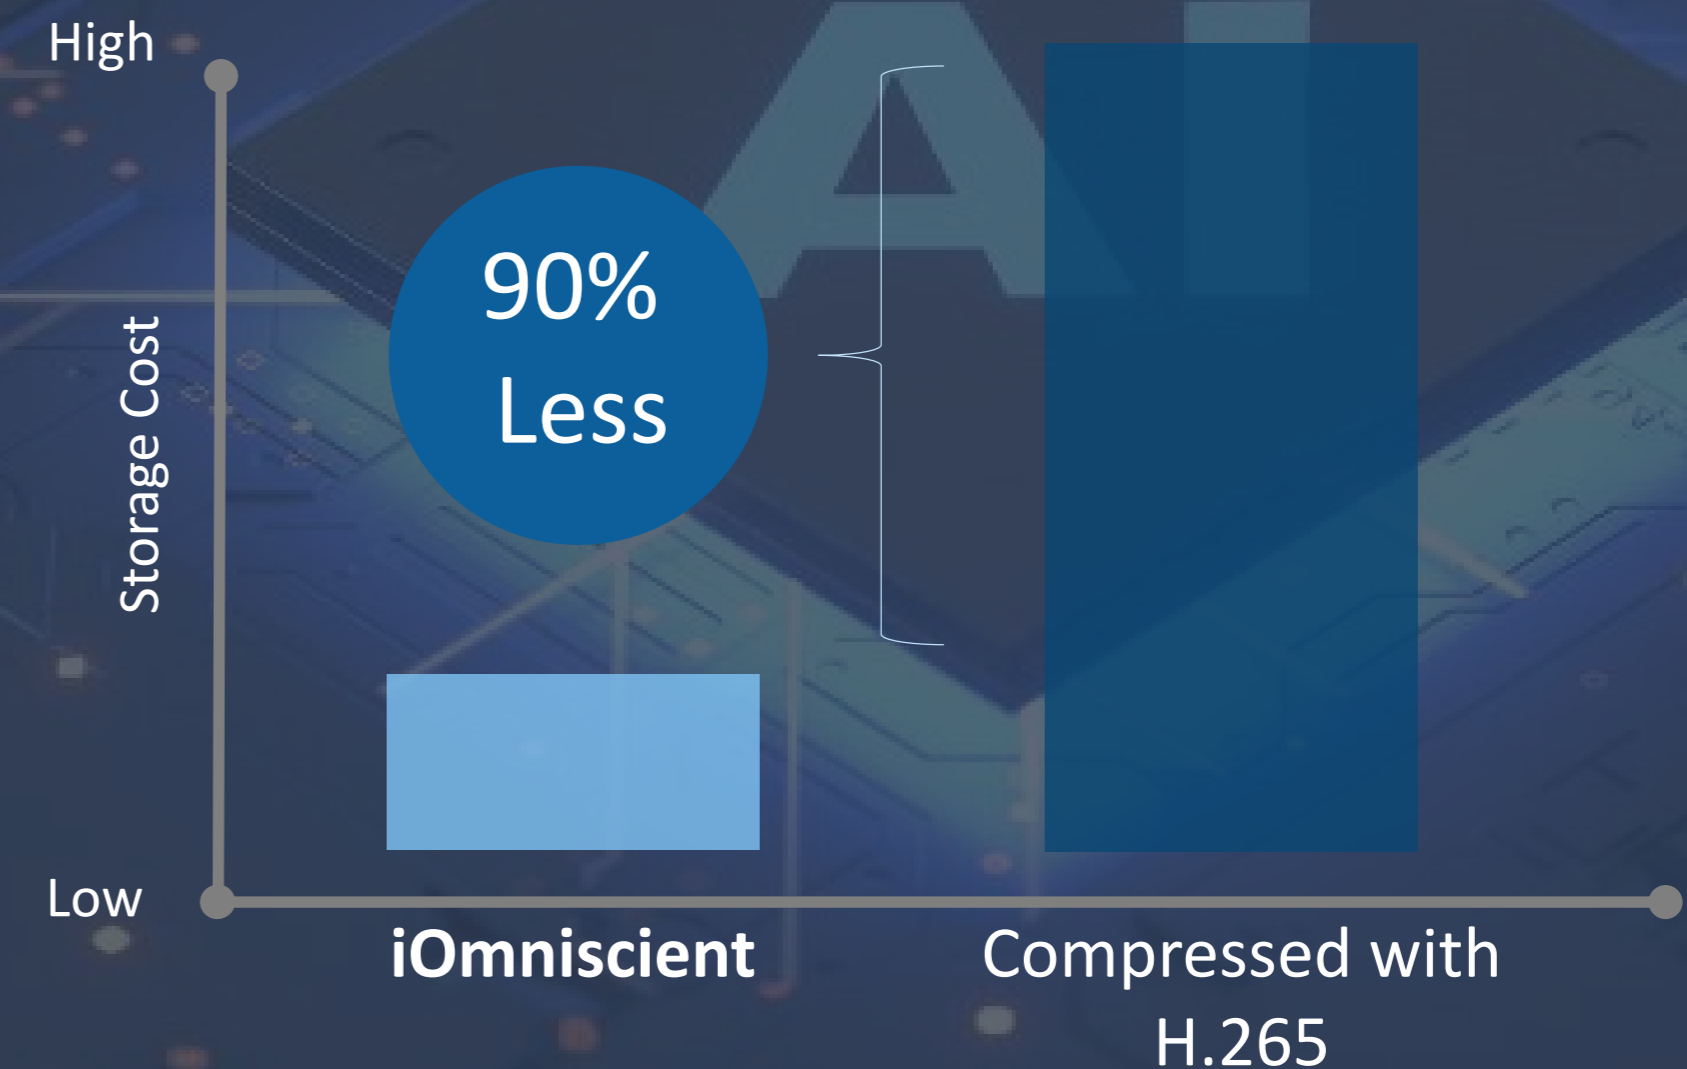

Save Infrastructure costs by Design

- 90% less storage
- 90% less network bandwidth
- No GPU
- 3x less manpower

Project Cost	\$2,000,000
Included Storage Cost (with industry standard compression)	\$880,000
Cost of iOmniscient Intelligence	+\$600,000
STORAGE SAVING THROUGH SMART COMPRESSION	-\$800,000
FINAL COST	\$1,800,000

Savings

Orica Chemicals, Indonesia

BP Gas Pipelines, Azerbaijan and Canada

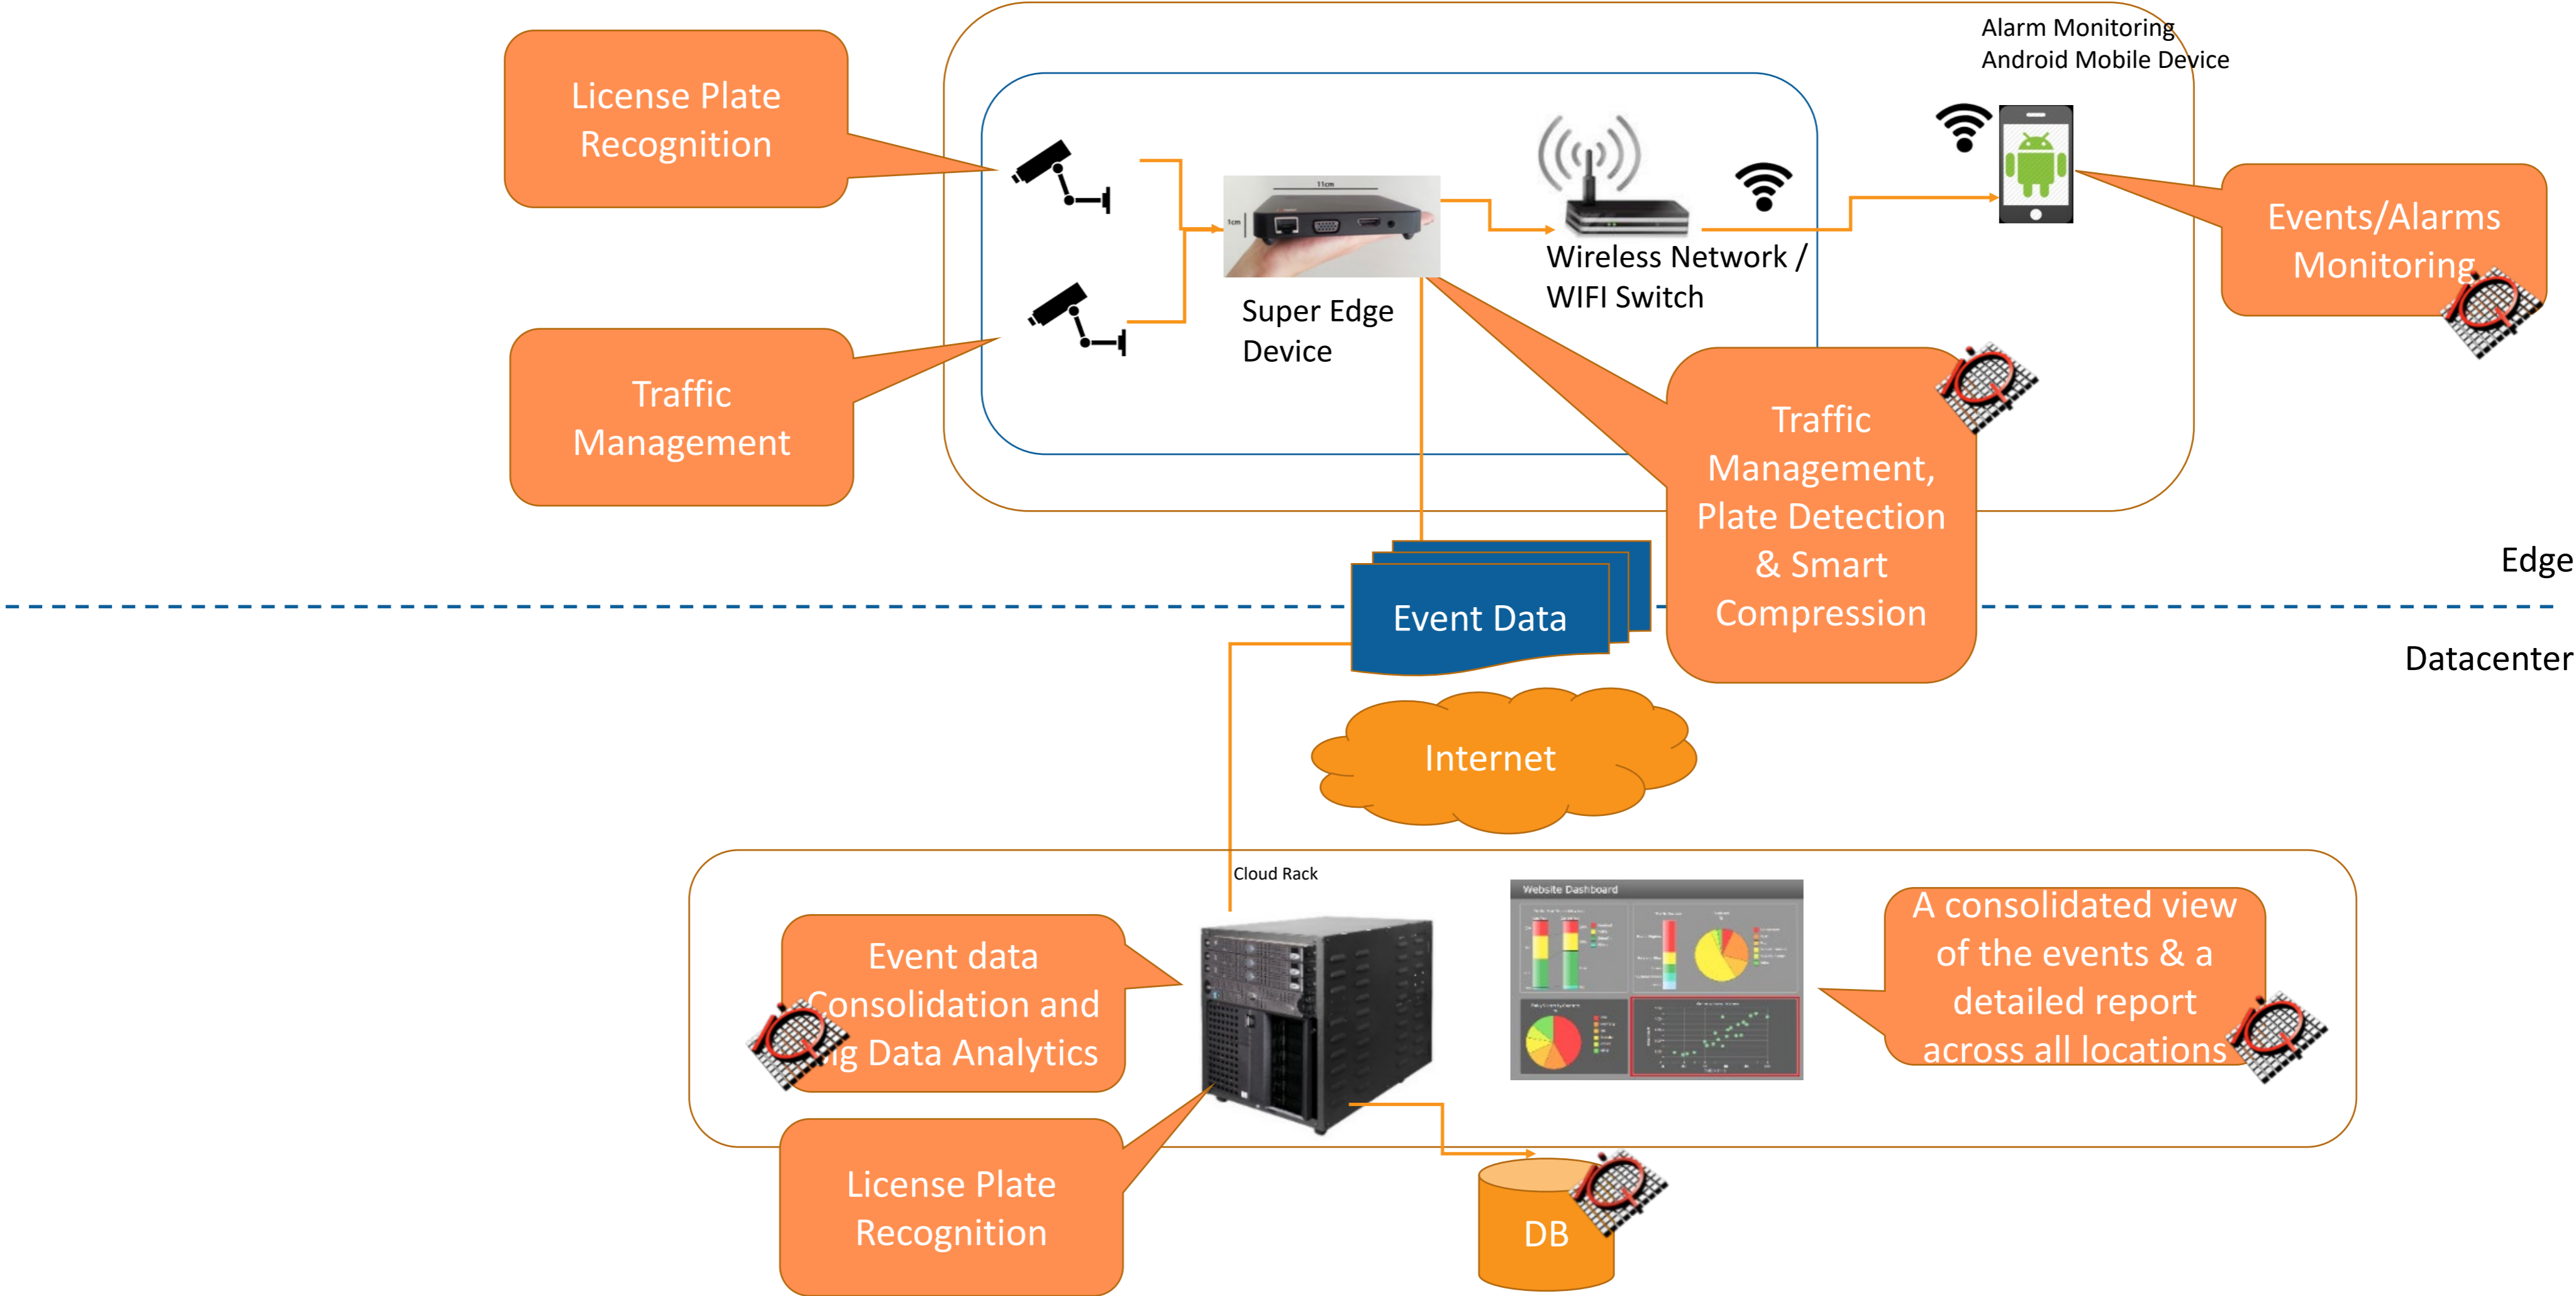

Chevron, USA

Pemex Mexico

Flexible Architecture

iOmniscient – PRESENCE EVERYWHERE

Projects in 70 countries

- Spanish Royal Palaces
- Dubai Mall
- University of San Francisco
- Karbala Mosque
- Sagrada Familia Cathedral
- Abu Dhabi Investment Authority
- Qatar Islamic Bank
- BP Pipeline, Azerbaijan
- Keppel Ports

- Singapore Smart City
- Bermuda Smart Island
- Suntec City, Singapore

- * Royal Thai Police
- * Royal Oman Police
- * Bahrain Prisons

Australian National Maritime Museum
has HIGH IQ

ANM protects its valuable assets with
iOmniscient's Intelligent Systems

- Kuala Lumpur International Airport Phase 1 & 2
- Mexico City Airport
- Antalya Airport, Turkey
- Canberra Airport
- Indonesia – 16 airports

- China Fast Train (1000 kms of track)
- Essen Railways, Germany
- Chengdu Metro
- Nanjing Metro
- Chicago Transit
- Italian Railways

Intel Alliance Partner of the Year - 2021

Next-Generation Tech Now

World's Oldest AI Based Computer Vision Company

21 Years Old in 2022

70+ International Patents

THANK YOU
