# WORKSHOP

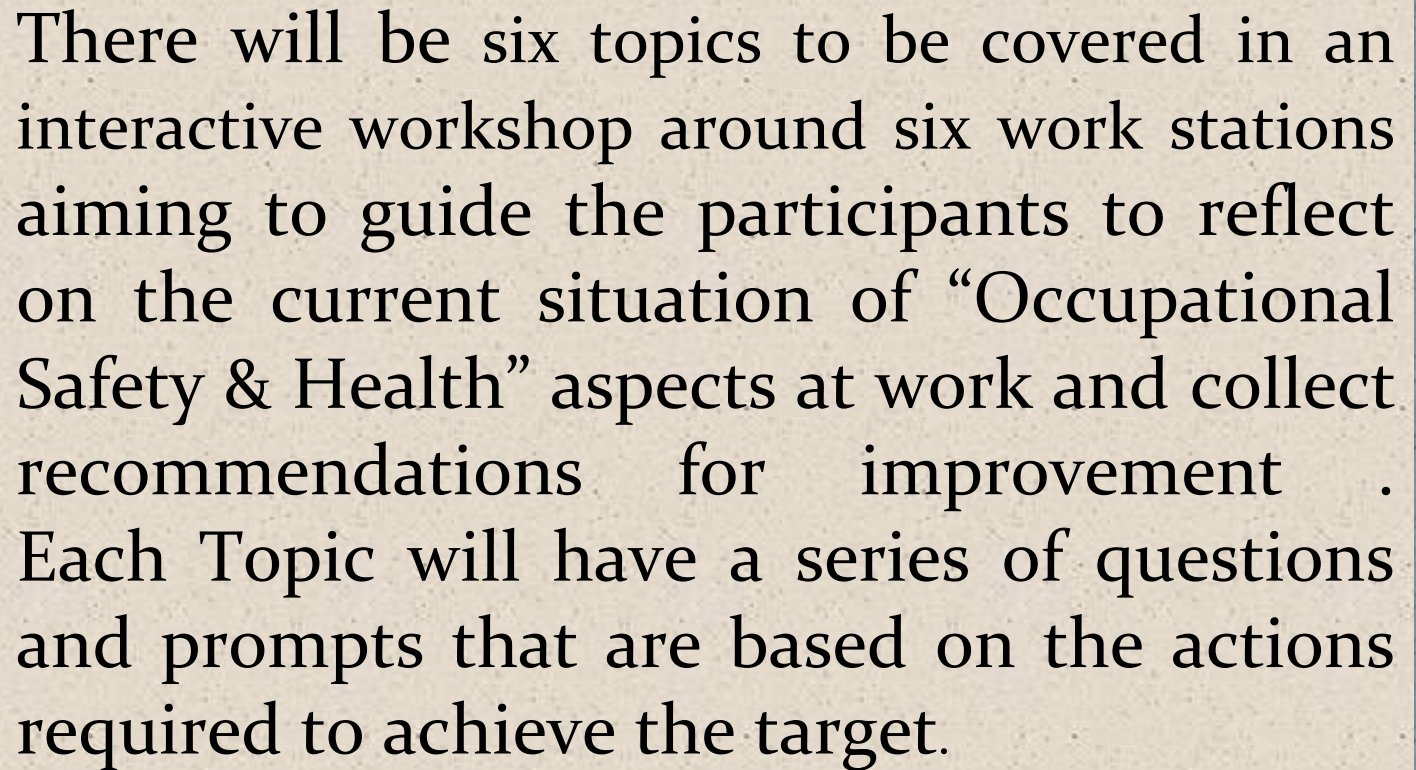

**Presented by:**

Dr. Ola Ahmed Mira

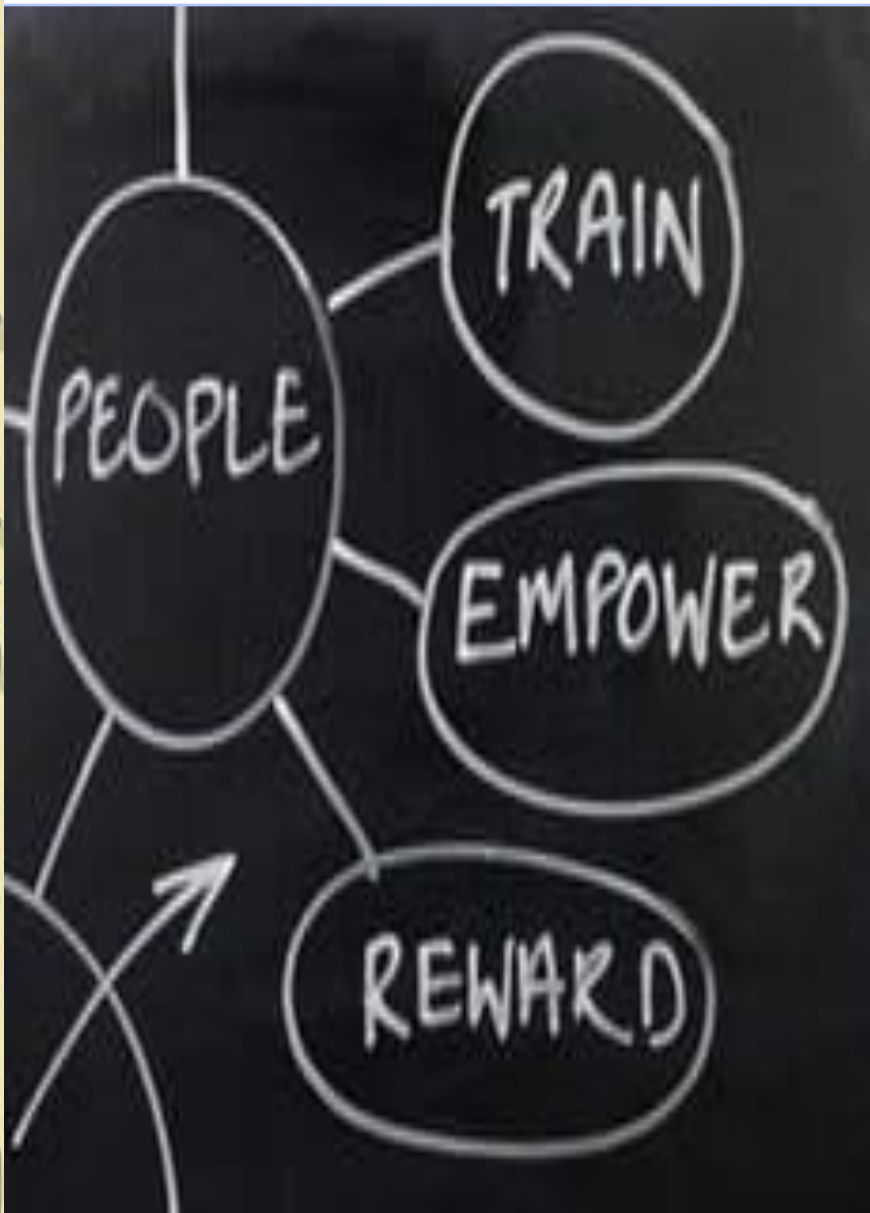

Director of National Radiation Protection Center

Ministry of Health & protection MOHAP

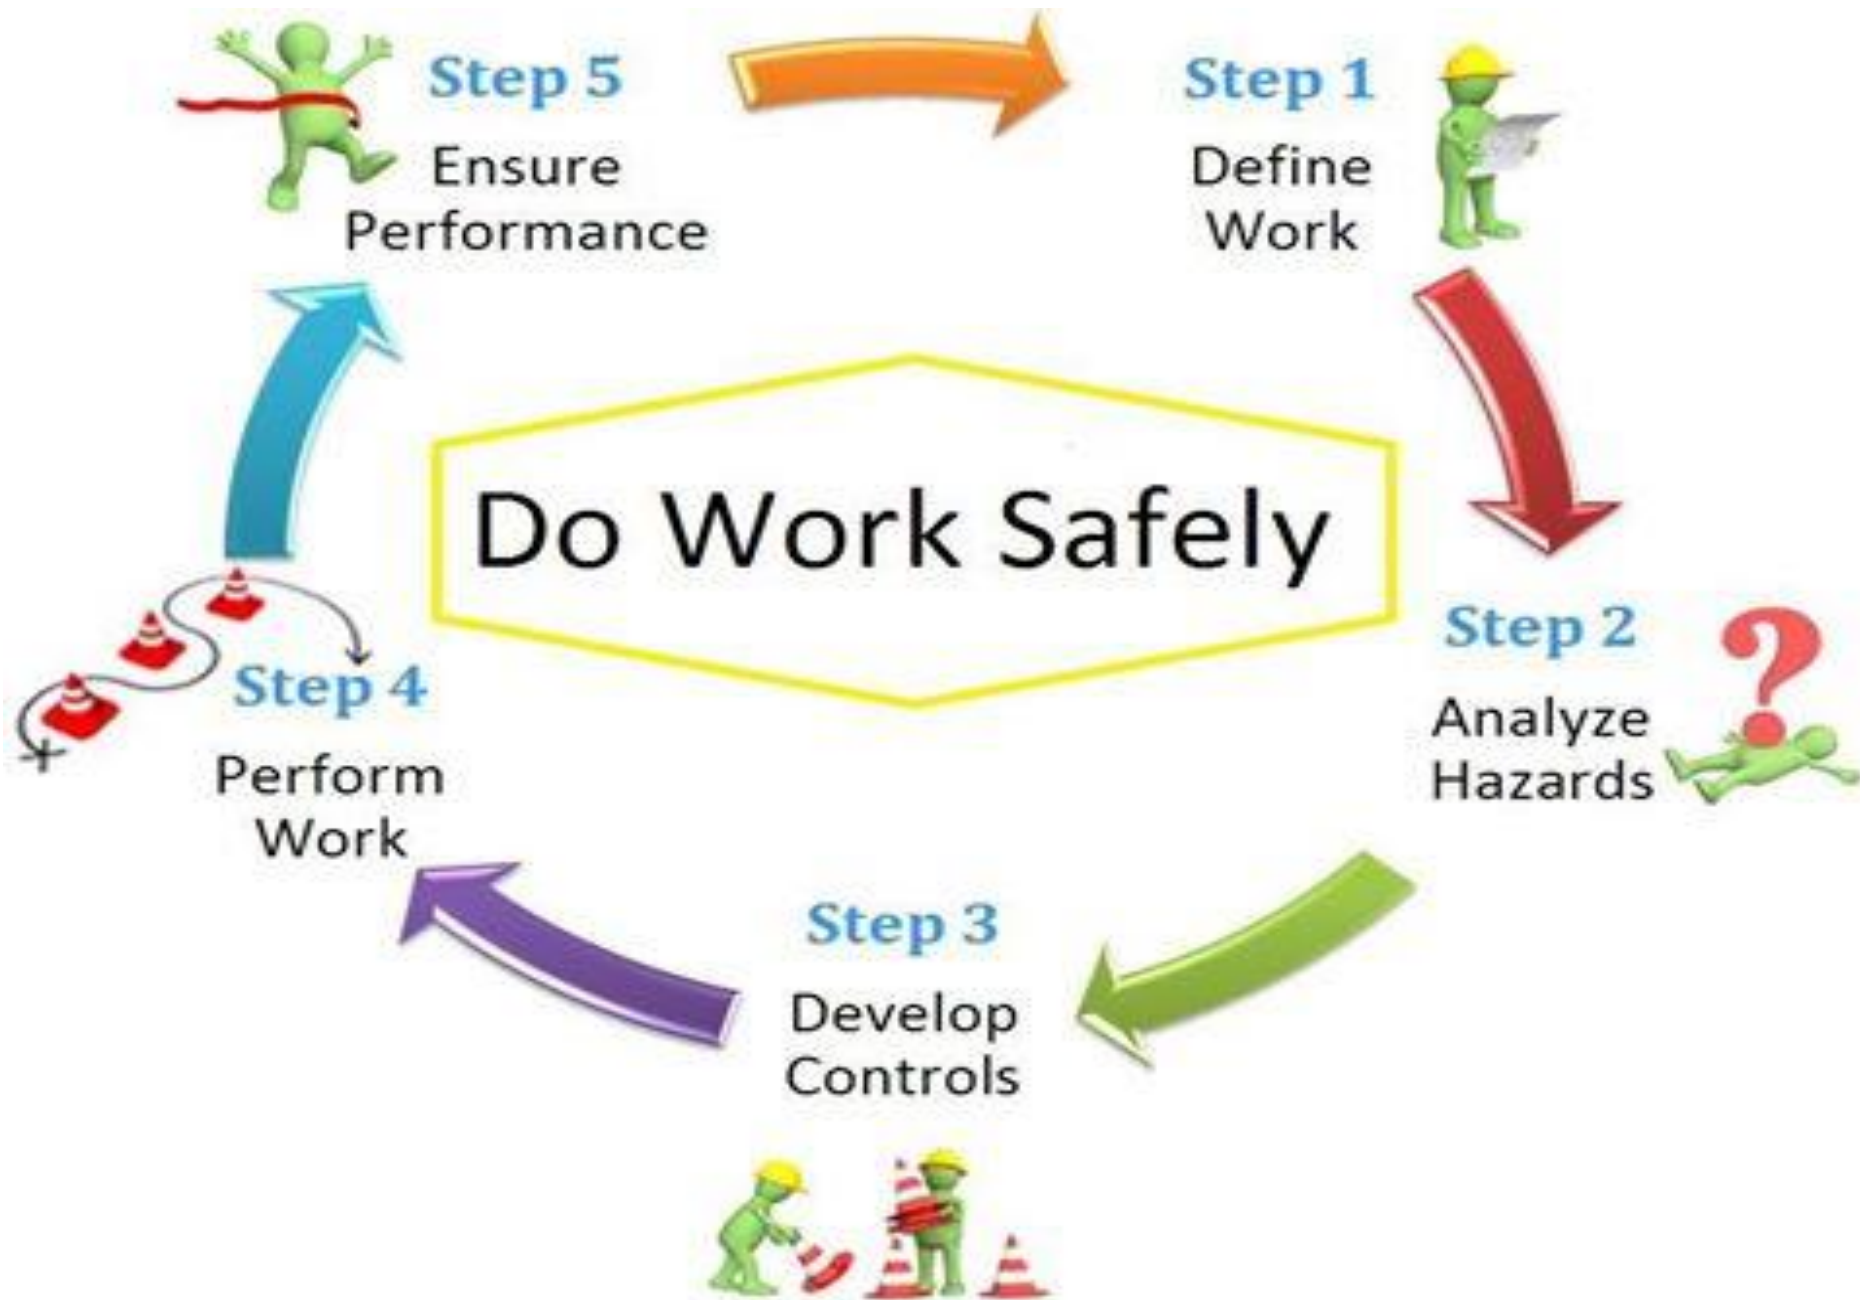

27 November 2018 Dubai

There will be six topics to be covered in an interactive workshop around six work stations aiming to guide the participants to reflect on the current situation of “Occupational Safety & Health” aspects at work and collect recommendations for improvement . Each Topic will have a series of questions and prompts that are based on the actions required to achieve the target.

The 4 C's of a positive culture:  
Control  
Co-operation  
Communication  
Competence

The following Topics will be addressed in  
this workshop

## Topic 1

What are the main mechanical, physical, chemical, biological and psychological risks in the working environment in UAE

## Topic 2

Identification and assessment of risks: Who / What /how are these being done in the UAE ?

The following Topics will be addressed in this workshop (cont.)

### Topic 3

Are there interventions in place for the prevention and control of these risks ?

### Topic 4

What surveillance systems are there for workers' health and occupational hazards ?

The following Topics will be addressed in this workshop (cont.)

## Topic 5

What is the coverage and quality of occupational health services in the UAE.

Does this need improvement? If so, how can this be achieved .

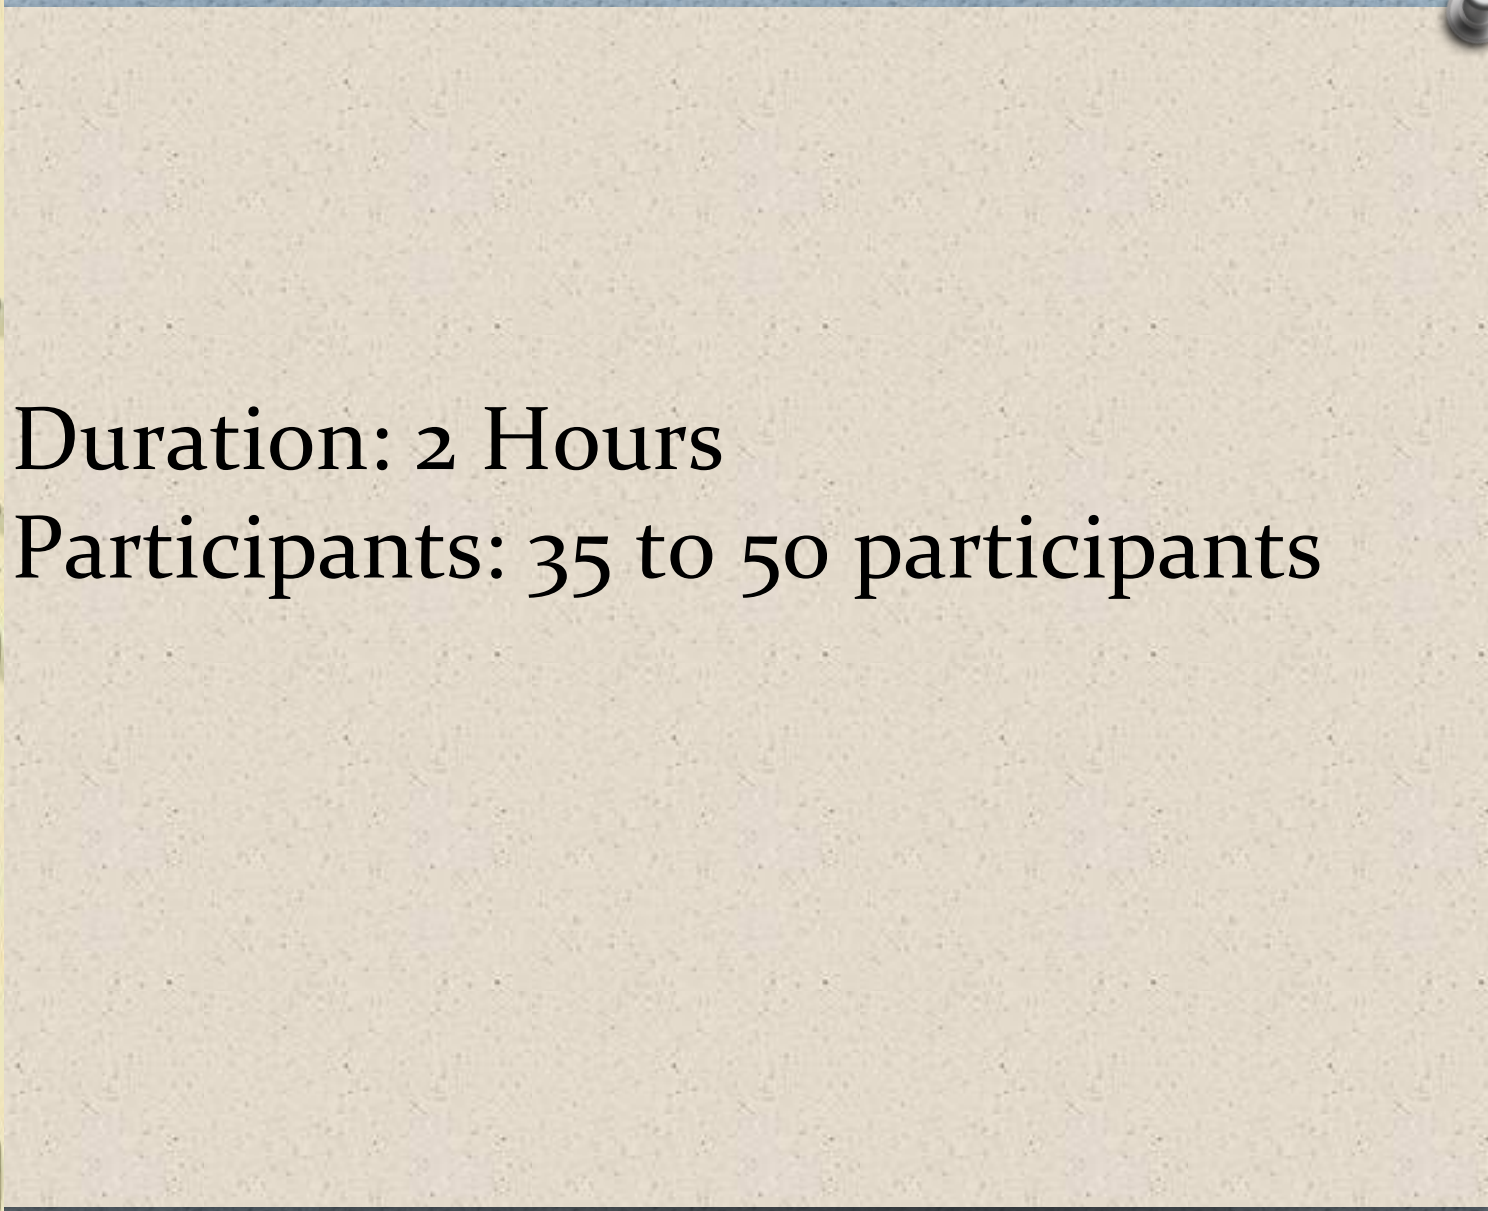

## Topic 6

In UAE, to what extent is workers' health included in the health policies of other sectors ?

The session will be animated around 6 work stations addressing the following topics

Duration: 2 Hours

Participants: 35 to 50 participants
